October 3, 2016

Dear [Redacted]

Re: Your request for access to information under Part II of the Access to Information and Protection of Privacy Act (Act) [Our file #ENV/038/2016]

On September 2, 2016 the Department of Environment and Climate Change received your request for access to the following records/information:

"Please provide all correspondence and records concerning [Redacted] and a development, work or application with regards to the beach in Brigus South. This request will cover the time period of January 2013 to present."

I am pleased to inform you that a decision has been made by the Deputy Minister of the Department of Environment and Climate Change to grant access in part to the requested information. Portions of the attached documents have been severed in accordance with the following exception to disclosure as specified in the Act:

40(1): The head of a public body shall refuse to disclose personal information to an applicant where the disclosure would be an unreasonable invasion of a third party's personal privacy.

As required by subsection 8(2) of the Act, we have severed information that is exempted from disclosure and have provided you with as much information as possible. In accordance with your request, the appropriate copies of records have been enclosed.

Section 42 of the Act provides that you may ask the Information and Privacy Commissioner to review the processing of your access request or you may appeal to the Supreme Court Trial Division. A request to the Commissioner must be made in writing within 15 business days of the date of this letter or within a longer period that may be allowed by the Commissioner.

The address and contact information of the Information and Privacy Commissioner is as follows:

Office of the Information and Privacy Commissioner
2 Canada Drive
P. O. Box 13004, Stn. A
St. John’s, NL
A1B 3V8
Telephone: (709) 729-6309
Toll-Free: 1-877-729-6309
Facsimile: (709) 729-6500
In the event that you choose to appeal to the Trial Division, you must do so within 15 business days after you receive the decision of the public body, pursuant to section 52 of the Act.

Please be advised that this response will be published following a 72 hour period after it is sent electronically to you or five business days in the case where records are mailed to you. It is the goal to have the response posted to the Completed Access to Information Requests website within one business day following the applicable period of time. Please note that requests for personal information will not be posted online.

If you have any questions, I can be reached by telephone at (709) 729-7183 or by e-mail at courtneyblundon@gov.nl.ca

Sincerely,

[Signature]
COURTNEY BLUNDON
Departmental ATIPP Coordinator
Good Morning s.40(1)

I can understand your frustration with regards to this issue taking place in your community and your concerns. I appreciate the apology.

I have discussed this issue with Mr. Parsons with Service NL and he, as well as another resident, has provided me with some contact information for s.40(1) and I will touch base with Steve Barnable with Crown Lands on any information he can provide me with regards to the land ownership.

I will be trying to get in contact with Rebello, Krista today regarding the work he has completed and proceed with addressing the infilling accordingly.

If there is anything else I can help you with please don't hesitate to contact me again. Thank you and have a good day.

Susan George
Water Resources Technician

Subject: s.40(1)

Sorry about the phone call... I definitely owed you a apology... I have Horton to the point I am so frustrated over s.40(1)... I sent the Eastern Regional Lands Manager a express letter... Steve Barnable... Concerning our issues never heard back yet... Also Chris Parsons is also receiving phone calls from others in Brigus.. I don't know if you all know each other... This is turning into a urgent matter... Is there anyway you can give him a written warning to prevent him from going any further with his development.. I was out to Howley Buling the land is open for claims.. Obviously he has nothing on it... Steve Barnable works there hopefully he'll look into also.. Please act fast with s.40(1), he has to be stopped

Thank You s.40(1)

Sent from my iPhone
Good Morning,

I have been contacted by several concerned residents in the Brigus South area regarding a [REDACTED] infilling in the cove near the outlet to Brigus Pond. I completed a site visit to the area on Tuesday, September 10th and have attached several pictures and a location map for your information.

Several of the residents informed me they had contacted Crown Lands regarding this issue and I was wondering if someone could confirm/provide me with any land ownership in this area, buffers and any previous aerial photographs of this area. Water Resources will be looking into this issue regarding infilling of a water body.

Any information you can provide would be greatly appreciated. If you have any questions please don't hesitate to contact me. Thank you!

I received multiple complaints from residents as well. Service NL also forwarded me some pictures and information (attached). We are trying to find the resources to get there for our own investigation.

There are no Crown Grants for any of the areas involved. There is no old mapping of the area that indicates land claims.

I have a request put in to the map and photo library to email you with scans of all the historical aerial photography.

Some residents said they could provide historical pictures of the area for reference if needed.

Hi Jeff,

Attached is an email complaint with the location and some pictures for your information. This is actually the second complaint that I have received about this particular incident.

Any help you could give me would be appreciated.

Subject: best to send in writing for Brigus South

I am writing to you on behalf of several residents of Brigus South, a small fishing community on route 10 on Southern Shore highway. We wish to express our concern regarding a development ongoing at Brigus South Harbour. Inhabitants consist of well established families, former residents and Americans who own property consisting of summer cottages. Non-permanent residents usually spend their summers in Brigus South. Hundreds of visitors from all over the world travel here every summer walking the East Coast Trail.

Our concern is that of a development ongoing on the beach by an individual named [Redacted] who apparently purchased a small plot of private land which he intends to develop. Over the past few weeks there has been at least 50 loads of fill taken from one side of harbour and transported via truck and dumped on the other side. The results are that now his supposedly purchased small plot of land extends into Brigus South Harbour giving him more area than the original supposedly measured land. [Redacted] purchased this land from the family of an individual who had a small shed on it during the 1920's which would have been claimed under squattee of rights law. He did not apply for permit under Water Resources Division to dig, transfer or dump fill in Harbour, nor should he have any legal right to land that is not surveyed or registered, these are all facts [Redacted] is a business man with a fleet of heavy equipment including dump trucks, back-hoe tractors and hugh loaders which erodes the road quality around the harbour. As he continues to move fill with hugh rocks, we are concerned that his attention is to construct a building to house his heavy equipment or a area to park them. There is a safety element involved with this development, higher than normal tide occurs in the winter which floods the beach area thus protecting the road. With this extension into the harbour impedes the excess water flooding the beach and will flood the road thus cutting off emergency services to some families. Fire trucks and ambulances will not have a road to deliver their services, this has to be addressed. His development has also damaged the habitat of the ducks that call Brigus South their home year round, these ducks have been a fixture in Brigus South for years. Also there are environmental concerns WRT petroleum products leaking from the heavy equipment into the harbour.

Unfortunately Brigus South does not have a Community Council which could control any proposed development within the community.

Brigus South is very beautiful and outstanding example of a functioning Newfoundland outport whose beauty is enjoyed by all who visit. Unfortunately this development will destroy a breathtaking view as you drive down the hill towards the harbour. This need not be, [Redacted] does not appear to have authorization or permission to proceed with this development and should be stopped. We would hope that your department investigate if all proper documentation and approval was acquired by [Redacted] prior to him proceeding with this development. If he did not obtain all permissions and documentation, we would expect and demand that he return our harbour to its pre-fill state. Please feel free to contact me with any questions you may have and I respectfully request a response soonest.
Yours Truly
I agree Steve.

From the most recent aerial photo I pulled from Bing Maps (see attached) and discussion with a few residents as well, the tidal action in this area is significant, extreme high and low tides. This shoreline may have changed significantly and besides any personal structures along the shoreline placed there over the years, there may not likely be any defined ownership.

What would happen in instances where there was no traceable land ownership? Would they be required to apply through CL's for the area?

It will be important to see those pictures with respect to shoreline reservation and occupation as the area has been well settled even prior to the 1799 census.

Perfect!

Thank you very much Jeff for that information and I completely understand regarding the resources.
As it stands with Water Resources, there is potential for flooding in this area being caused by the infilling. We will be contacting [Redacted] and requesting he stop all work completed so that we may properly review all areas of this work for regulatory requirements prior to requesting action, as required, on his part.

Thank you again!

Subject: RE: Brigus South - Infilling Issue

Hard to say Susan, I basically know a little bit about it from a genealogical interest and I have an extensive 1799 nominal census. I don’t know specifically if there are existing historic maps for that area, but it would be analogous to Ferryland where my crowd are from... and I have maps over time for Ferryland showing structures on the reservation in very precise locations to the 1750's...some areas of Ferryland can claim occupation of the reservation to the 1600's. In cases such as this we generally can only offer quit claims should someone be interested in titles...or the courts can issue title under the Quieting of Titles Act, but it is a case by case thing. Application would need to be made for anything outside of the foreshore though.

Puerto Santa María
1930 - 30
The boundary lines shown are intended to be used as an index to land titles issued by the Crown.
I plan to restore the site to previous conditions with some upgrading.

A rock boundary will be put in place to help protect any further erosion from the sea.

A small wharf of 10-15 ft and a slip way of 10 ft for my boat will be constructed.

Fill and topsoil will also be placed on the site.

In addition, I will carry out some dredging to deepen the water around the site for a boat.

The materials that will be used are spruce sticks as well as pressure treated lumber, nails, spikes.

The equipment to be used is an excavator. All precautions will be taken to preserve the site.

Any more info not on attached please.

Call
Good Morning

I am emailing to confirm that I have received all of the information you have attached to the email. Once I have had the opportunity to review I will be in contact again regarding a site visit to the area.

If I require any additional information I will be in contact. Thank you.

One more thing (I am sorry, I will stop pestering you soon). (the area where he dumped the fill and now giant rocks on the beach) in an effort to continue I suppose. parts of the beach garden (not the beach of course), Just wanted to make you aware of this.

I know you have things well in hand and I am not asking for info - just remembered while

You're welcome.

I'm sure I will hear from Keith at some point over the next couple of days regarding the situation.

We are moving forward with this issue, but at this time because it is ongoing I can not discuss anything in detail until it has been resolved or a conclusion reached.

If anything else should arise, please let me know. You have been a great resource and we appreciate your cooperation. Thank you and have a great day!

Hi Susan

Just a note to thank you again for what you are doing.

Also wanted to let you know that Keith Hutchings came by yesterday to view the area, and talk to a few local residents. You may know that already but thought I would tell you in case you did not. He seemed to be in touch with your offices and understood the situation as well.

He has been moving the fill from the the area where his backhoe and equipment are/were near visitors parking to the beach area on other side of road as you come down hill. I have not seen him on other side (right side) myself. It's possible but I have not seen.

Subject: Sign

It was small sign and very low to the ground, have to crouch down to read it. The Gov Official spent a lot of time determining where to place it, it is awkward the sign is/ was at the end of dredge area, to read it you would have to walk out to the water edge of dredged lane. Now it is low tide and looks like the rocks have been piled up perhaps covering it or not, will try to get better look

took pictures of it yesterday and tried to pull it up???

Sent from my iPhone s.40(1)
Hi Chris,

I would not be able to tell you what was on the actual sign. Crown Lands only indicated that someone from their Division placed the sign there.

Susan George
Water Resources Technician
(P) (709) 729-2945

Hi Chris,

Do you have any idea what was on the sign?

Chris

Hi Chris,

Thanks for the response. It was determined that someone from Crown Lands put the sign in this area. They are having someone look into the matter.

Thanks!

Susan George

Hi Susan,

I forgot to email you on that yesterday, got back to office late in the day. We posted a stop work order for the fill deposited on the east side of the harbour which appeared to be for a breakwater. From past pictures it looks like about half of the length has already been eroded away. There was a small newly constructed crib in the area sheltered between the existing wharf and the breakwater. There was a wharf/pier visible on 1955 aerial photography that was likely similar to the existing one adjacent to it. The past wharf does not automatically give permission to construct a new one 50 years after the original disappeared.

hi - hope you are well.

I hate to be in back in touch on same topic but I just learned from residents of Brigus South that has once again commenced his illegal digging up of the ocean floor and using the fill to build a slice of land on the beach in Brigus South for himself. Last year, Environment finally came out and put up a sign (which he took down) asking that digging stop.

Today he has started once again - using his own personal heavy equipment to dig up fill and spreading it on the public beach area in Brigus.

Once again, asking if something can be done before it goes any further again?

hi again

It is my understanding that someone from the community called a Mr. Nickerson this a.m. who may be in your division and gave him the telephone number for this man (prob his cell number). I just looked in phone book and it says [redacted so that might be another one to try. Being a rural community, there are no addresses here, but he is living [redacted] his trucks and equipment rumble by every day.

[redacted] it looks as though he might have driven his smaller backhoe (which is not here now either - has been there for months) across the ocean floor again to deliver more rocks to the beach area. We can see the tracks quite clearly at low tide. I am not entirely sure these are old or new as he has done it before.

We are hopeful he will be told to stop doing what he is doing while this is looked into at least.

Thanks again for what you are doing!

Hi [Name] - S.40(1)

If you have any contact information for this gentleman, whether it be a phone number or address, it would be greatly appreciated. I am the main point of contact for these issues; however, because there are only two people in the Water Investigations Section, including myself, it is difficult to leave the office when this work is occurring and we do not have any after hours staff members to address them either.

I really appreciate your cooperation on the matter and any information you can provide would be greatly appreciated. Thank you.

Good Morning

I was just checking in to see if there has been any progress on the investigation into the issue of the gentleman who is illegally building his own land mass with fill from the ocean in Brigus South harbor? Since I last contacted you, he has driven across the ocean floor at low tide to deliver more rocks to his own artificial harbor area. Th fill has also been flattened out.
Good day

These pictures were taken Mon with his excavator on Brigus South Beach. I also have pictures if his activities on the beach last fall.

Haseen,

We were dealing with this last year from the perspective of dredging and possible infilling of the water. WRMD had asked [REDACTED] to stop the infilling work so that we could do more follow up on the land ownership etc. and that he would require permits from WRMD for any dredging he wished to undertake in this area.

I recall having a conversation at some point with Steve Barnable with CL's about land ownership in Brigus South. He explained that because the history of the area goes back hundreds of years it was difficult to determine who had owned what land or what might have existed previously.

[REDACTED] was not given a permit to do any dredging work but if he is completing dredging he may require a permit.

I have attached a Google Earth and Touratech Topo map of the area for your information.

Hello,

I am wondering if there will be any action taken for the beach destruction here in Brigus South. I know that it was being looked into but have yet to hear if there will actually be anything done about it. It has now been over a year since I first brought this matter to the government's attention. I am hoping that the damage that has been done will be cleaned up. I would appreciate a timely reply.

Regards,

Yes, Krista and Susan were involved. To the best of my recollection Stop Order was issued by Crown Lands. 
Abdel - Can you check and update.

Haseen: 
Is WRMD aware of this? Please investigate and advise. Thanks

Regards, Martin

Hi Pat

The above pictures are of Brigus South. Last year there was a stop work order put on the work that was happening on the beach the operator is [REDACT] This work has now resumed and we are getting a lot of complaints from residents, can you please check on this for me please. s.40(1)
Thanks
Joan

We posted the eastern side of the harbour (see attached pictures), however there was also infilling on the western side of the harbour. I can't locate a good copy of the Order, but you can read it in the photograph.

Hi Jeff,

The issue of s.40(1) in Brigus South has come up again as it appears he is completing more work in the area. From the emails below, it was determined that Crown Lands had erected a sign and issued a Stop Work Order to s.40(1) for this work. Would you happen to have a copy of this order or other information you can send along to WRMD?

This is a bit of a time sensitive issue, so if you could get back to me ASAP it would be appreciated.

Thank you!

Susan George

Hi Chris,

Thanks for the response. It was determined that someone from Crown Lands put the sign in this area. They are having someone look into the matter.

Thanks!

Good Morning

I am not aware of anyone in Water Resources having put the sign in this area. It may have been someone from Service NL or Crown Lands. I have copied someone from both areas for their information. Thank you!

Begin forwarded message:
A Government official was in Brigus south today ... Put a sign in the area where the fill was being taken from, upon his departure a person emerged from his residence and removed the sign, residents were unable to determine the contents of the sign, are you aware of anyone in your department or other departments that may have erected the sign, any investigation and response on your part would be much appreciated.

Thank You
