Dear [Redacted]

Re: Your request for access to information under Part II of the Access to Information and Protection of Privacy Act [Our file #ENV/002/2014]

On January 13, 2014, the Department of Environment and Conservation received your request for access to the following records:

"A copy of any and all applications, documents, correspondence, and emails related to the Town of Upper Island Cove Crown Land application dated September, 24, 2012, found on map #0N11N1 – 410, in the calendar year of 2013"

I am pleased to inform you that your request for access to these records has been granted in part. Access to specific text contained within the records, has been refused in accordance with the following exceptions to disclosure, as specified in the Access to Information and Protection of Privacy Act (the Act):

Section 30(1) "The head of a public body shall refuse to disclose personal information to an applicant where the disclosure would be an unreasonable invasion of a third party's personal privacy."

In accordance with your request for a copy of the records, the appropriate copies have been enclosed.

Section 43 of the Act provides that you may ask the Information and Privacy Commissioner to review this partial refusal of access or you may appeal the refusal to the Supreme Court Trial Division. A request to the information and Privacy Commissioner shall be made in writing within 60 days of the date of this letter or within a longer period that may be allowed by the Commissioner.
The address and contact information of the Information and Privacy Commissioner is as follows:

Office of the Information and Privacy Commissioner
34 Pippy Place
P.O. Box 13004, Stn. A
St. John’s, NL A1B 3V8

Telephone:  (709) 729-6309
Facsimile:  (709) 729-6500

In the event that you choose to appeal to the Trial Division, you must do so within 30 days of the date of this letter. Section 60 of the Act sets out the process to be followed when filing such an appeal.

Please be advised that responsive records will be published following a 72 hour period after the response is sent electronically to you or five days in the case where records are mailed to you. It is the goal to have the responsive records posted to the Office of Public Engagement's website within one business day following the applicable period of time. Please note that requests for personal information will not be posted online.

If you have any further questions, please feel free to contact the ATIPP Coordinator at telephone (709) 729-7393.

Sincerely,

[Signature]

JAMIE CHIPPETT
Deputy Minister
Good Morning Gary,

I'm going to review your email and information provided with a few of my colleagues that were also informed of the concerns raised regarding the storm drainage issue. Clyde had originally aided in the drafting of those comments and since he is no longer with us it is difficult to determine what may specifically be requested.

I will get back to you when I can on this matter. Thank you!

Susan George

Subject: referral for Town of Upper Island Cove 142000

During the processing of this application we received complaints from two individuals (see attached) concerning if development took place it could affect their unprotected water supply. It appears that you did address their concerns somewhat in your referral. The office is a bit weary about approving the application with the conditions IF storm water discharge discharges into the Town of Bishops Cove......... We are wondering if their would be some form of engineering assessment/study ??? that we could recommend to the Town of Upper Island Cove. We could approve the application but recommend that prior to any construction taking place it would be advisable to conduct a ????? study on the affects of the development on adjacent properties.

Gary, I am trying to track this one down regarding two complaints that were sent in that it will affect water quality of a spring that is serving some homes in the area. It was referred to WRMD, but I do not know if the letters were sent. It seems that oddly, this is held pending zoning, which is unusual as we freeze, then accept applications. Can you check into this and let me know. I have checked the file room but no luck. If it is held, I do not know where it would be. Thanks.

Morning Steve wondering if you get a chance some time this morning if you would give me a call here at the office. 729-2359.

Gary was in to see me and has some concern over an approval to the Town of Upper Island Cove for a subdivision development.

Thanks

Glenn
Steve
This file has been sent to RLC Council called because they are now developing the adjacent site and a contractor is on site now and it they had their title they could install water and sewer on both parcels of land.

February 17, 2012

Dear Mr. Barnable

In recent months I have noticed a new subdivision being constructed to the south and west of Greenley Street in the town of Upper Island Cove. It presently borders the old cart track known locally as the Grassy Road on its south side. The east side of this old cart lane has recently been excavated to allow for water and sewer for the subdivision and will become an access road. During a recent conversation with the town of Upper Island Cove I discovered they were planning to apply for the small piece of land on the south side of this road to possibly extend the subdivision in the future. I have several concerns with any possible approval of land for an extension and are as follows:

1. As indicated on the attached image, our drinking water supply for myself and a number of other residents of Bishop’s Cove originates from the adjacent stream (indicated) which supplies much of the ground water for shallow wells. If water and sewer is properly installed at the present subdivision and no storm sewers are allowed to be ran onto any property on its SW side, I feel we may be spared from any consequences of pollution related to this activity. I have had regular bacteria analysis and a chemical analysis conducted on our drinking water and it presently meets all Canadian Standards. By maintaining the small area of crown land on the south side of the Grassy Road will ensure a buffer exists which will hopefully protect our drinking and domestic water supply for years to come.

2. My other concern with additional acquisition of land in the area south of the Grassy Road for residential development is that of flooding. During tropical storm Chantal and hurricane Igor, significant amounts of water drained from the area adjacent to the stream shown on the image and caused significant damage and flooding near my home and further east in the community. Any further development in this area would eliminate ground cover and add to the run off possibly causing increased damage downstream to people and property in the area west of the church at Bishop’s Cove. I also feel if drainage is put in place to allow any excess water flowing from the new subdivision to be diverted to the SE away from our drinking water supply, no adverse effects will result.
As the present buffer area slopes south from the new subdivision, I feel this will become an issue for myself and other Bishop's Cove residents if any extension is approved. I feel the Department of Environment and Conservation will take this into due consideration prior to making a decision on approving any crown land acquisitions in this area in the future. I am confident there are many other areas inside the Town of Upper Island which can be developed which will have little or no impact on adjacent residents of either community.

During the past few months I have also conversed on several occasions with Mr. Ron Goulding of the Dept. of Environment to ensure he was aware of our concerns. I appreciate his interest and understanding with the matter as it relates to the issues of pollution and flooding downstream from the development.

Thank you for your consideration and I look forward to hearing from you in the near future.

Sincerely yours,

April 21, 2012

Dear Mr. Barnable

We are writing you concerning a new subdivision being constructed to the south and west of Greenley Street in the town of Upper Island Cove. We didn't know anything about this until it was brought to our attention by a recent conversation with the town of Upper Island Cove and discovered they were planning to apply for a small piece of land on the south side of this road to possibly extend the subdivision in the future. We have several concerns with any possible approval of land for an extension.

1. We have concerns for the stream that supplies much of the ground water for shallow wells. Please take note that this would affect approximately one third of the residents in the Town of Bishop's Cove.

2. Another concern is the possibility of flooding in the event of any future tropical storms. Any further development in this area would eliminate this cover and add to the run off possibly causing increased damage downstream to people and property in the area west of the church in Bishop's Cove. We also feel if drainage is not put in place to allow excess water flowing from the new subdivision to be diverted to the SR away from our drinking water supply, no adverse effects will result.

As the present buffer area slopes south from the new subdivision, we feel this will become an issue for the residents of Bishop's Cove if any extension is approved. We ask that no development proceed on the south side of Greenley Road.
Thank you in advance for your cooperation in this matter and we look forward to hearing from you soon.

Sincerely,

Section 30(1)
MEMO

Date: November 15, 2012

To: Department of Environment and Conservation
   Eastern Regional Lands Office

From: Susan George
       Water Resources Technician, Water Investigation Section

Re: Application #142000/File # 1000678
   Town of Upper Island Cove – Commercial (To extend existing
   residential subdivision) (Upper Island Cove)

Recommendation: Approval (Conditional)

The proposed development has the potential to increase storm water runoff which
may result in or aggravate flooding in the Town of Bishop’s Cove or the Town of Upper
Island Cove. The Water Resources Management Division (WRMD) recommends that:

   a) If the storm water discharge from the proposed development discharges into
drainage networks which flow into the Town of Bishop’s Cove, then the
   proponent must implement a no net increase in runoff (1:100 year return
   period) for this development.

   b) If the storm water discharge from the proposed development discharges into
drainage networks which are completely within the Town of Upper Island Cove
   than the proponent must undertake the necessary engineering assessments
to ensure that any increase in storm runoff (1:100 year return period) does
   not result in flooding.

The proponent must maintain a minimum 15 metre wide undisturbed buffer along
the high water mark of all bodies of water in the area. If work is necessary within this
buffer, the proponent must apply to this Division for a permit under Section 48 of the
Water Resources Act.

Any effluent or runoff leaving the site will be required to conform to the requirements

Susan George

Susan George
I've looked into this area and we don't have an application anywhere in the vicinity. I contact Clyde but got his voice mail. I did leave a message an advised him that we do not have any sort of application for the area in question.

I have also drafted and attached a response letter Please review, print off and sign and give to Sherry/Arlene to send out.

Subject: CL Appl 142000

Geralyn:

RE: CL Application 142000

Thank you for the opportunity to meet and discuss this application. As you are aware, the Town of Upper Island Cove are proposing to extend onto an existing residential subdivision which requires the acquisition of Crown Land (CL).

The entire area is zoned Residential-1, however part of the area encroaches into a Blueberry Management Unit (BMU). There is no BMU Zone, but is indicated as a "feature" on the Town's land use zone map. This would mean that a referral is required to Agriculture branch.

In your CL referral, you indicated an amendment is required. After our conversation today, you will agree that the CL application can be approved by you with comments requiring a referral to Agriculture.

Of interest, I understand that Agriculture branch has already approved the CL application which would reinforce your comments. By way of this e-mail, Gary Myler of Lands can verify.

I am available should you wish to discuss further.
Good Morning,

There were several issues raised about the approval of the above noted referral as outlined in the email below and which was reviewed, I do believe, by both of your sections. The response sent back to CL's was provided to me by Clyde, but now CL's has bounced back with what specific recommendations we should make to the Town regarding any studies that could/should be undertaken to alleviate any further concerns raised.

I am not sure if there is any specific study (study name) that could be recommended so I'm asking for some input from you guys. Thank you for your help!

Nothing from my end unless they can redirect the storm water in another direction. One other option for the town may be able to install a small system that could separate out any hydrocarbons that end up in the storm sewer.

Subject: RE: referral for Town of Upper Island Cove 142000

Good Morning Gary,

I'm going to review your email and information provided with a few of my colleagues that were also informed of the concerns raised regarding the storm drainage issue. Clyde had originally aided in the drafting of those comments and since he is no longer with us it is difficult to determine what may specifically be requested.

I will get back to you when I can on this matter. Thank you!

Susan George
Water Resources Technician
(P) (709) 729-2945

Subject: referral for Town of Upper Island Cove 142000

During the processing of this application we received complaints from two individuals (see attached) concerning if development took place it could affect their unprotected water supply. It appears that you did address their concerns somewhat in your referral. The office is a bit weary about approving the application with the conditions. IF storm water discharge discharges into the Town of Bishops Cove............. We are wondering if their would be some form of engineering assessment/study ??? that we could recommend to the Town of Upper Island Cove. We could approve the application but recommend that prior to any construction taking place it would be advisable to conduct a ????? study on the affects of the development on adjacent properties.
