April 21, 2017

Dear [Redacted]

Re: Your request for access to information under Part II of the Access to Information and Protection of Privacy Act [Our File #: SNL-028-2017]

On March 23, 2017, Service NL received your request for access to the following records/information:

I am requesting any documentation (including reports, correspondence, orders) prepared or issued by OHS at the Granite Canal site since November 2, 2016. In addition to the general request noted above, I am also requesting any documentation (including reports, orders and related correspondence) relating specifically to Service NL/OHS orders #0941610 and #0941605.

I am pleased to inform you that a decision has been made by Service NL to provide access to some of the requested information. However, access to pages 121-126 cannot be provided to you in accordance with the following exception to disclosure, as specified in the Access to Information and Protection of Privacy Act (the Act):

Section 30(2): "The head of a public body shall refuse to disclose to an applicant information that is subject to solicitor and client privilege or litigation privilege of a person other than a public body."

In addition, access to specific lines of text contained within the responsive documents has been refused in accordance with the following exceptions to disclosure as per the Act:

Section 40(1): "The head of a public body shall refuse to disclose personal information to an applicant where the disclosure would be an unreasonable invasion of a third party’s personal privacy."

As required by 8(2) of the Act, we have severed information that is unable to be disclosed and have provided you with as much information as possible. In accordance with your request for a copy of the records, the appropriate copies have been enclosed.

Please be advised that you may appeal this decision and ask the Information and Privacy Commissioner to review the decision to provide partial access to the requested information, as set out in section 42 of the Act (a copy of this section of the Act has been enclosed for your reference). A request to the Commissioner must be made in writing within 15 business days of the date of this letter or within a longer period that may be allowed by the Commissioner. Your appeal should identify your concerns with the request and why you are submitting the appeal.
The appeal may be addressed to the Information and Privacy Commissioner as follows:

Office of the Information and Privacy Commissioner
2 Canada Drive
P. O. Box 13004, Stn. A
St. John’s, NL A1B 3V8

Telephone: (709) 729-6309
Toll-Free: 1-877-729-6309
Facsimile: (709) 729-6500

You may also appeal directly to the Supreme Court Trial Division within 15 business days after you receive the decision of the public body, pursuant to section 52 of the Act (a copy of this section of the Act has been enclosed for your reference).

Please be advised that responsive records will be published following a 72 hour period after the response is sent electronically to you or five business days in the case where records are mailed to you. It is the goal to have the responsive records posted to the Completed Access to Information Requests website within one business day following the applicable period of time. Please note that requests for personal information will not be posted online.

If you have any further questions, please contact me by telephone at 709-729-7437 or by email at ellenhaskell@gov.nl.ca.

Sincerely,

[Signature]

ELLEN HASKELL
ATIPP Coordinator

Enclosures
Access or correction complaint (Section 42)

42. (1) A person who makes a request under this Act for access to a record or for correction of personal information may file a complaint with the commissioner respecting a decision, act or failure to act of the head of the public body that relates to the request.

(2) A complaint under subsection (1) shall be filed in writing not later than 15 business days

a) after the applicant is notified of the decision of the head of the public body, or the date of the act or failure to act; or

b) after the date the head of the public body is considered to have refused the request under subsection 16 (2).

(3) A third party informed under section 19 of a decision of the head of a public body to grant access to a record or part of a record in response to a request may file a complaint with the commissioner respecting that decision.

(4) A complaint under subsection (3) shall be filed in writing not later than 15 business days after the third party is informed of the decision of the head of the public body.

(5) The commissioner may allow a longer time period for the filing of a complaint under this section.

(6) A person or third party who has appealed directly to the Trial Division under subsection 52 (1) or 53 (1) shall not file a complaint with the commissioner.

(7) The commissioner shall refuse to investigate a complaint where an appeal has been commenced in the Trial Division.

(8) A complaint shall not be filed under this section with respect to

a) a request that is disregarded under section 21;

b) a decision respecting an extension of time under section 23;

c) a variation of a procedure under section 24; or

d) an estimate of costs or a decision not to waive a cost under section 26.

(9) The commissioner shall provide a copy of the complaint to the head of the public body concerned.

Direct appeal to Trial Division by an applicant (Section 52)

52. (1) Where an applicant has made a request to a public body for access to a record or correction of personal information and has not filed a complaint with the commissioner under section 42, the applicant may appeal the decision, act or failure to act of the head of the public body that relates to the request directly to the Trial Division.

(2) An appeal shall be commenced under subsection (1) not later than 15 business days

a) after the applicant is notified of the decision of the head of the public body, or the date of the act or failure to act; or

b) after the date the head of the public body is considered to have refused the request under subsection 16 (2).

(3) Where an applicant has filed a complaint with the commissioner under section 42 and the commissioner has
refused to investigate the complaint, the applicant may commence an appeal in the Trial Division of the decision, act or failure to act of the head of the public body that relates to the request for access to a record or for correction of personal information.

(4) An appeal shall be commenced under subsection (3) not later than 15 business days after the applicant is notified of the commissioner’s refusal under subsection 45 (2).

F: 902-625-1453
REPORT:
Arrived on site with fellow OHS Officer John Morgan and met with [redacted] (ABB Project Manager) and [redacted] (JSM Electrical) to conduct an inspection.

Mr. Morgan will be issuing a separate report to ABB for any issues related to emergency response.

JSM Electrical Ltd has been contracted by ABB Inc to construct an electrical switchyard at this site. At the time of today's inspection steel support structures are in the process of being constructed/erected and electrical cables are being pulled through the various conduit passages.

Workers were observed to be wearing head, eye and foot protection equipment along with high visibility apparel. Field level risk assessments are being conducted along with pre-trip inspections on powered mobile equipment (including 2 telehandlers and an aerial lifting platform). An inspection program is in place for all tools and equipment and many tools were observed to be taped indicating that they were in a safe condition. Pre-use inspections are being conducted on rigging and fall arrest equipment and workers have been trained in rigging and fall arrest. Workers using the telehandler and aerial lifting platform also report that they have attended training to operate this equipment. However, training certificates were not available at the time of the inspection and the equipment was not in use.

The switchyard construction site is exceptionally well organized and clean. Any workers or visitors that enter the site are required to participate in an orientation prior to entry.

The undersigned officer is requesting copies of training certificates for operators of the telehandlers and aerial lifting platform.

The undersigned officer did note that several fire extinguishers installed on rented mobile equipment at the site were missing an inspection tag which indicated that they have been inspected within the last year. One order issued.

The management and staff of JSM Electrical are commended for their efforts towards ensuring the health and safety of workers at this site.

A copy of this inspection/order report must be provided at the earliest possible opportunity to your OHS Committee, Worker Representative or Workplace Designate.

TAKE NOTICE THAT YOU ARE TO COMPLY WITH THE FOLLOWING ORDER(S) ISSUED UNDER AUTHORITY OF THE OCCUPATIONAL HEALTH AND SAFETY ACT, REVISED STATUTES OF NEWFOUNDLAND AND LABRADOR 1990, CHAPTER 0-3 AS AMENDED AND REGULATIONS PASSED PURSUANT THERETO.

ORDER: 0661833-01

REGULATION: Part XX - Fire Prevention & Control

443 1- Fire protection

The design and occupancy of structures and the provision of fire alarm and detection equipment and fire protection equipment, in places of employment, shall comply with the Fire Prevention Act, 1991 and an employer shall ensure that work is carried out according to the applicable provisions of that Act and the National Fire Code.

TO WIT:

The employer shall ensure that all fire extinguishers at its work location have been inspected by a qualified person within the last year. Additionally fire extinguishers shall be mounted in a location where they are readily accessible.

This Order shall be carried out on or before: NOV 30, 2016

YOU ARE TO NOTIFY THE INSPECTOR IN WRITING UPON COMPLIANCE.

FAILURE TO COMPLY WITH THE ABOVE ORDER(S) IS AN OFFENCE UNDER SECTION 67 OF THE OCCUPATIONAL HEALTH AND SAFETY ACT, RSNL 1990, CHAPTER 0-3 AS AMENDED.

AN ORDER MADE BY AN OFFICER MAY BE APPEALED, IN WRITING, TO THE ASSISTANT DEPUTY MINISTER WITHIN 7 DAYS OF THE ORDER.

A copy of this inspection/order report must be provided at the earliest possible opportunity to your DHS Committee, Worker Representative or Workplace Designate.

Good Morning Welson,

Thank you for sending a copy of the report.

I have reviewed all information presented in the report. The efforts of all personnel on site to maintain a safe & healthy work environment is positive & it certainly sets a standard for all to uphold to & maintain.

One item to note is the report indicates that the training certificates were not available for those operating equipment. I spoke with the Supervisor ( ), he indicated that you had requested the certificates which he stated were available down in the trailer, & in St.John’s, but you did not come to view them. Further, please note that the operators do not carry all of their certifications on their person as there is a risk of misplacing, or lost in the field. However all of their certificates are on site & additionally maintained at the main office in St. John’s. Could you please review the report based on the information included in this email and make the necessary changes to the report and re-send.

Kindest regards,
To: [Redacted]@ca.abb.com

Hi Welson,

Please find signed attached copies of the report and order.

Please ensure that the following items are completed.

1) Provide training certs for Individuals who are operating the Telehandlers and Aerial Work Platforms as per the Inspection Report
2) Compliance with United rental equipment Fire Extinguisher tags/inspections and mounting of extinguisher on the wall by the exit door of the tool crib trailer.

Your help and cooperation with this matter is greatly appreciated.
Keep up the great work.

Regards,

Good afternoon,

Thanks for the response. The Inspection reports states: “However, training certificates were not available at the time of the inspection and the equipment was not in use.” This does not mean that training certificates were not available at all but simply that they were not available at the construction site during the inspection. Time did not permit to allow a visit to the camp to review certificates so this is why certificates were requested. I see no need to change the report as it is accurate in its current format.

Overall, I was impressed with safety management at the site and commended JSM Electrical for its efforts. Signing for receipt of the report does not mean that you agree with the details of the report; it simply means that you received the report. Please sign for receipt of the report and return a copy of the signed report and orders.

If you have any questions or comments, please get in touch.

Good Morning Welon,

Thank you for sending a copy of the report.

I have reviewed all information presented in the report. The efforts of all personnel on site to maintain a safe & healthy work environment is positive & it certainly sets a standard for all to uphold to & maintain.

One item to note is the report indicates that the training certificates were not available for those operating equipment. I spoke with the Supervisor ( ), he indicated that you had requested the certificates which he stated were available down in the trailer, & in St. John’s, but you did not come to view them. Further,
please note that the operators do not carry all of their certifications on their person as there is a risk of misplacing, or lost in the field. However all of their certificates are on site & additionally maintained at the main office in St. John’s. Could you please review the report based on the information included in this email and make the necessary changes to the report and re-send.

Kindest regards,

Hi Welson,

Please find signed attached copies of the report and order.

Please ensure that the following items are completed.

1. Provide training certs for individuals who are operating the Telehandlers and Aerial Work Platforms as per the Inspection Report
2. Compliance with United rental equipment Fire Extinguisher tags/inspections and mounting of extinguisher on the wall by the exit door of the tool crib trailer.

Your help and cooperation with this matter is greatly appreciated.
Keep up the great work.

Regards,

Section 40(1)

Employees: 11
NIC: 4261
Insp. Time: 2:00PM

REPORT:

Arrived on site with fellow OHS Officer John Morgan and met with [ABB Project Manager] and [JSM Electrical] to conduct an inspection.

Mr. Morgan will be issuing a separate report to ABB for any issues related to emergency response.

JSM Electrical Ltd has been contracted by ABB Inc to construct an electrical switchyard at this site. At the time of today's inspection steel support structures are in the process of being constructed/erected and electrical cables are being pulled through the various conduit passages.

Workers were observed to be wearing head, eye and foot protection equipment along with high visibility apparel. Field level risk assessments are being conducted along with pre-trip inspections on powered mobile equipment (including 2 telehandlers and an aerial lifting platform). An inspection program is in place for all tools and equipment and many tools were observed to be taped indicating that they were in a safe condition. Pre-use inspections are being conducted on rigging and fall arrest equipment and workers have been trained in rigging and fall arrest. Workers using the telehandler and aerial lifting platform also report that they have attended training to operate this equipment. However, training certificates were not available at the time of the inspection and the equipment was not in use.

The switchyard construction site is exceptionally well organized and clean. Any workers or visitors that enter the site are required to participate in an orientation prior to entry.

The undersigned officer is requesting copies of training certificates for operators of the telehandlers and aerial lifting platform.

The undersigned officer did note that several fire extinguishers installed on rented mobile equipment at the site were missing an inspection tag which indicated that they have been inspected within the last year. One order issued.

The management and staff of JSM Electrical are commended for their efforts towards ensuring the health and safety of workers at this site.

A copy of this inspection/order report must be provided at the earliest possible opportunity to your OHS Committee, Worker Representative or Workplace Designate.

TAKE NOTICE THAT YOU ARE TO COMPLY WITH THE FOLLOWING ORDER(S) ISSUED UNDER AUTHORITY OF THE OCCUPATIONAL HEALTH AND SAFETY ACT, REVISED STATUTES OF NEWFOUNDLAND AND LABRADOR 1990, CHAPTER 0-3 AS AMENDED AND REGULATIONS PASSED PURSUANT THERETO.

ORDER: 0661833-01

REGULATION: Part XX - Fire Prevention & Control
443 1 - Fire protection

The design and occupancy of structures and the provision of fire alarm and detection equipment and fire protection equipment, in places of employment, shall comply with the Fire Prevention Act, 1991 and an employer shall ensure that work is carried out according to the applicable provisions of that Act and the National Fire Code.

TO WIT:

The employer shall ensure that all fire extinguishers at its work location have been inspected by a qualified person within the last year. Additionally fire extinguishers shall be mounted in a location where they are readily accessible.

This Order shall be carried out on or before: NOV 30, 2016

YOU ARE TO NOTIFY THE INSPECTOR IN WRITING UPON COMPLIANCE.

FAILURE TO COMPLY WITH THE ABOVE ORDER(S) IS AN OFFENCE UNDER SECTION 67 OF THE OCCUPATIONAL HEALTH AND SAFETY ACT, RSNL 1990, CHAPTER 0-3 AS AMENDED.

AN ORDER MADE BY AN OFFICER MAY BE APPEALED, IN WRITING, TO THE ASSISTANT DEPUTY MINISTER WITHIN 7 DAYS OF THE ORDER.

A copy of this inspection/order report must be provided at the earliest possible opportunity to your OHS Committee, Worker Representative or Workplace Designate.

Worker Rep/Designate: Unknown

REPORT:

Arrived onsite on March 8, 2017 at approximately 0930 hours with fellow Officer Darren Kavil. The purpose of this visit was to complete an inspection of the work site. Upon arrival we met with HSE Advisors with ABB. We were accompanied during the Inspection by Mr. Morgan. Representatives from Emerga Field Safety Advisor and Site Supervisor also took part in the site visit.

The following was noted at the time of inspection and orders issued:

1) During the inspection, we visited the L2 Cooling Tower Foundation area. There were metal posts sticking up approximately 1 foot high in this area. The posts were not guarded.

2) A worker was observed in a trench that was more than 1.22m in depth where improper trenching techniques were observed. The worker was asked to leave the area (stop work order issued).

3) The area outside the west access door to the main building was observed to be in an unsafe condition. Material has been partially removed from the area, a loose board with protruding nail was in place at the bottom of the door frame and a generator and cords were partially obstructing the exit pathway outside the door.

4) The access panel was open on Magnum light plant 9M4168. The plant was running at the time of observation and was being used to power a frost fighter being used to heat fill material.

At approximately 1415 hours, the undersigned and Officer Kavil were leaving site when we observed a tandem truck, license plate CXV 372, parked in a quarry area near the Trans Canada Highway access to the Bottom Brook HVDC Converter Station. The box of the truck was elevated and workers were performing maintenance on the equipment.

5) A stop work order was issued for work being performed where the body of the worker was under the elevated box and the box was not secured against inadvertent movement.

6) The wheels of the equipment noted above were not chocked.

7) The operator was not wearing high visibility apparel. High visibility apparel was available to the

A copy of this inspection/order report must be provided at the earliest possible opportunity to your OHS Committee, Worker Representative or Workplace Designate.
worker but given the environmental conditions, the high vis had been removed so that it was not heavily soiled by mud, etc. from the equipment being maintained (greased). Rain gear provided was not of high vis material. Equipment/workers from another contractor were operating in the area.

There were seven orders issued to Dexter Construction Company Limited as a result of this inspection.

Dexter Construction Company Limited has been identified as a contractor of Cahill Fabrication Structural Limited who is a contractor of ABB Inc. Cahill Fabrication Structural Limited and ABB Inc. will receive a copy of this report as a result.

Emera Newfoundland and Labrador has been identified as the principal contractor for the work described in this report. As principal contractor, Emera Newfoundland and Labrador is responsible for ensuring compliance with the Newfoundland and Labrador Occupational Health and Safety Act and Regulations. As a result, Emera Newfoundland and Labrador will receive a copy of this report.

Hello

Attached is inspection report 0941609 dated March 8, 2017. Please have it signed in both places and return it to my attention at your earliest convenience.

I have also included inspection reports:
0941599 - JSM Electrical Ltd.
0941600 - Westward Industrial Inc.
0941601 - MSM Construction Services Ltd.
0941602 - Young's Industrial Refrigeration Ltd.
0941603 - Island Dynamics Inc.
0941614 - MasTec Canada Construction Inc.
0941605 - Dexter Construction Company Limited
0941613 - Stark International
0941606 - Cahill Fabrication Structural Limited

Please have them distributed to the associated contractors and have them signed and returned to my attention.

I have forwarded a copy of MasTec Canada Construction Inc.’s to Brandon along with a copy of his contractor’s reports as follows:
0941600 - Westward Industrial Inc.
0941601 - MSM Construction Services Ltd.
0941602 - Young’s Industrial Refrigeration Ltd.
0941603 - Island Dynamics Inc.

I will forward a copy to Emera Newfoundland and Labrador on Monday.

Give me a shout Monday if you would like to discuss, 709-637-2422.

Regards,
Carol

REPORT:

Section 40(1)

Arrived onsite on March 8, 2017 at approximately 0930 hours with fellow Officer Darren Kavli. The purpose of this visit was to complete an inspection of the work site. Upon arrival we met with the HSE Advisors with ABB. We were accompanied during the inspection by Mr. and we spoke with various workers from each of the contractors who we encountered on site. Representatives from Emera NL. Field Safety Advisor and Site Supervisor also took part in the site visit.

Reports have been issued to various contractors as a result of this inspection. As general contractor on site, ABB Inc. will receive a copy of the reports listed below:

0941599 - JSM Electrical Ltd.
0941600 - Westward Industrial Inc.
0941601 - MSM Construction Services Ltd.
0941602 - Young’s Industrial Refrigeration Ltd.
0941603 - Island Dynamics Inc.
0941614 - MaeTec Canada Construction Inc.
0941605 - Dexter Construction Company Limited
0941613 - Stark International
0941606 - Cahill Fabrication Structural Limited

The following was noted at the time of inspection and orders issued:

Section 40(1)

1) Clarification that the required occupational health and safety committees and representatives are set up at this work site and are performing their respective duties is required.

Section 40(1)

There is one order issued to ABB Inc. as a result of this inspection.

Section 40(1)

A close out meeting took place with Trenching techniques were discussed and all were reminded that the requirements of Section 406 of the Newfoundland Health and Safety regulations is followed in regards to trenching.

Emera Newfoundland and Labrador has been identified as the principal contractor for the work described in this report. As principal contractor, Emera Newfoundland and Labrador is responsible for ensuring compliance with the Newfoundland and Labrador Occupational Health and Safety Act and

REPORT:

Arrived onsite on March 8, 2017 at approximately 0930 hours with fellow Officer Darren Kavli. The purpose of this visit was to complete an inspection of the work site. Upon arrival we met with [redacted] and the Journey Person Electrician [redacted] and HSE Advisors with ABB. We were accompanied during the inspection by Mr. [redacted] and another ABB employee. We were accompanied during the inspection of the JSM work site inside and outside e-house.

The following was noted at the time of inspection and orders issued:

1) Cable trays outside the e-house building require covers. There were open and snow filled areas outside both exits.

2) In the yard where testing of the 230kv breakers was taking place, scaffolding was set up with rigid top rail and no midrail at the working platform access level.

There are two orders issued to JSM Electrical Ltd. as a result of this inspection.

JSM Electrical Ltd. has been identified as a subcontractor of ABB Inc. ABB Inc. will receive a copy of this report as a result.

Emera Newfoundland and Labrador has been identified as the principal contractor for the work described in this report. As principal contractor, Emera Newfoundland and Labrador is responsible for ensuring compliance with the Newfoundland and Labrador Occupational Health and Safety Act and Regulations. As a result, Emera Newfoundland and Labrador will receive a copy of this report.

A copy of this inspection/order report must be provided at the earliest possible opportunity to your OHS Committee, Worker Representative or Workplace Designate.

REPORT:

Arrived onsite on March 8, 2017 at approximately 0930 hours with fellow Officer Darren Kavl. The
purpose of this visit was to complete an inspection of the work site. Upon arrival we met with
HSE Advisors with ABB. Representatives from Emera NL Field
Safety Advisor and Site Supervisor accompanied us on this site visit and we spoke with
various PowerTel workers as well.

Workers were working on tower base assembly at the time of our arrival. An FLRA had been filled out
by Field was identified as the General Foreman on site. Workers reviewed
the FLRA with us. The job description listed on the FLRA was “Offload equipment, assemble tower
bases”. Certified first aiders were identified on the FLRA and four of six crew members were identified
as having first aid training. Safety head gear, safety footwear, safety eyewear and high visibility apparel
was being worn by all workers observed.

There were no orders issued as a result of this inspection.

Emera Newfoundland and Labrador has been identified as the principal contractor for the work
described in this report. As principal contractor, Emera Newfoundland and Labrador is responsible for
ensuring compliance with the Newfoundland and Labrador Occupational Health and Safety Act and
Regulations. As a result, Emera Newfoundland and Labrador will receive a copy of this report.

Arrived onsite on March 8, 2017 at approximately 1200 hours with fellow Officer Darren Kavil. The purpose of this visit was to complete an inspection of the work site. We were accompanied during the inspection by representatives from Emera NL [redacted] Field Safety Advisor and [redacted] Site Supervisor. On site we met with [redacted] who identified himself as an employee of Major's Logging Limited.

[redacted] was on site completing mulching work and had a John Deere mulcher on site, equipment #13. A pre-shift inspection report was readily available and a first aid kit and fire extinguisher were in the cab of the equipment. The operator was wearing safety headgear, safety eyewear, safety footwear and high visibility apparel.

The following was noted at the time of inspection and orders issued:

1) [redacted] was working alone and does not have a valid first aid training certificate.

2) There was a fuel tank in the back of pick up truck with license plate number CTN155. Although there was an identification label on the top of the tank it was difficult to see standing at ground level. A label is required so that it is visible from approach.

There are two orders issued to Majors Logging Limited as a result of this inspection.

Emera Newfoundland and Labrador has been identified as the principal contractor for the work described in this report. As principal contractor, Emera Newfoundland and Labrador is responsible for ensuring compliance with the Newfoundland and Labrador Occupational Health and Safety Act and Regulations. As a result, Emera Newfoundland and Labrador will receive a copy of this report.

A copy of this inspection/order report must be provided at the earliest possible opportunity to your OHS Committee, Worker Representative or Workplace Designate.

Arrived onsite on March 8, 2017 at approximately 0930 hours with fellow Officer Derren Kavli. The purpose of this visit was to complete an inspection of the work site. Upon arrival we met with [person] HSE Advisors with ABB. We were accompanied during the inspection by Mr. [person], Site Supervisor, also took part in the site visit.

The following was noted at the time of inspection and orders issued:

1) During the inspection, we visited the L2 Cooling Tower Foundation area. There were metal posts sticking up approximately 1 foot high in this area. The posts were not guarded.

2) A worker was observed in a trench that was more than 1.22M in depth where improper trenching techniques were observed. The worker was asked to leave the area (stop work order issued).

3) The area outside the west access door to the main building was observed to be in an unsafe condition. Material has been partially removed from the area, a loose board with protruding nail was in place at the bottom of the door frame and a generator and cords were partially obstructing the exit pathway outside the door.

4) The access panel was open on Magnum light plant 9M4168. The plant was running at the time of observation and was being used to power a frost fighter being used to heat fill material.

At approximately 1415 hours, the Undersigned and Officer Kavli were leaving site when we observed a tandem truck, license plate CXV 372, parked in a quarry area near the Trans Canada Highway access to the Bottom Brook HVDC Converter Station. The box of the truck was elevated and workers were performing maintenance on the equipment.

5) A stop work order was issued for work being performed where the body of the worker was under the elevated box and the box was not secured against inadvertent movement.

6) The wheels of the equipment noted above were not chocked.

7) The operator was not wearing high visibility apparel. High visibility apparel was available to the

TAKE NOTICE THAT YOU ARE TO COMPLY WITH THE FOLLOWING ORDER(S) ISSUED UNDER AUTHORITY OF THE OCCUPATIONAL HEALTH AND SAFETY ACT, REVISED STATUTES OF NEWFOUNDLAND AND LABRADOR 1990, CHAPTER 0-3 AS AMENDED AND REGULATIONS PASSED PURSUANT THERETO.

ORDER: 0941605-01

REGULATION: Part III - General Duties
18 1 Safety Inspections

Regular inspections of all buildings, excavations, structures, machinery, equipment, work practices and places of employment shall be made by the employer or his or her representative at intervals to ensure that safe working conditions are maintained and that unsafe conditions found as a result of the inspection are remedied without delay.

TO WIT:

The employer shall ensure the protruding ends of steel observed at the L2 cooling tower foundation area are removed or effectively covered/guarded.

This Order shall be carried out on or before: MAR 13, 2017

ORDER: 0941605-02

ACT: Occupational Health and Safety
27 - 1b Stop work orders

Where the assistant deputy minister or an officer is of the opinion that work is being carried out in a way that the condition at the workplace pose an immediate risk to the health and safety of workers engaged in the workplace or other persons at or near the workplace, the assistant deputy minister or officer shall, in writing, order the person at the workplace responsible for the work being carried out before resuming the work, to take the remedial measures specified in the order that are in the opinion of the assistant deputy minister or officer necessary to ensure that the work can be conducted without further risk to the health and safety of the workers or other persons at or near the workplace.

A copy of this inspection/order report must be provided at the earliest possible opportunity to your OHS Committee, Worker Representative or Workplace Designate.
ORDER FORM

REGULATION: Part XVIII - Excavation, Underground Work

408 4-a Pre-excavation requirements

A worker shall not enter an excavation over 1.22 metres deep unless the sides of the excavation are sloped to a safe angle and have been secured by the use of sheet piling, shoring and bracing or a trench box; or

TO WIT:

The employer shall ensure that the trench at this work site be maintained at an angle of safe repose, benched, sheet piling, shoring or a trench box is used prior to a worker entering the trench where it is more than 1.22m deep.

This Order shall be carried out on or before: MAR 8, 2017

ORDER: 0941605-03

REGULATION: Part XXII - Access and Egress

458 1- Access, egress and movement

All workplaces shall have safe and appropriate means of access and egress.

TO WIT:

The employer shall ensure exit doors are clearly marked and the path of exit kept clear and free of obstructions and other hazards.

The area outside the west access door to the main building was observed to be in an unsafe condition. Material has been partially removed from the area, a loose board with protruding nail was in place at the bottom of the door frame and a generator and cords were partially obstructing the exit pathway outside the door.

This Order shall be carried out on or before: MAR 14, 2017

REGULATION: Part III - General Duties
19 2- Co-ordination of work

A principal contractor shall ensure work schedules and tasks are organized to provide safe working conditions for workers.

TO WIT:

The principal contractor shall ensure work schedules and tasks are organized to provide safe working conditions for workers. Access throughout the work site including to and from buildings on site must be maintained at all times. Where access must be changed due to work being completed, all contractors on site must be notified of the same.

Noted on site at the time of inspection was congestion on the work site, especially around the roadway used to travel through the site. Also, see inspection report 0941605 issued to Dexter Construction Company Limited, order #03. It was said that access to the building was changed with very little notice early on the day of March 8, 2017. Access to one doorway was removed due to excavation work being completed outside the north-west end of the building. The west access door path of travel was partially obstructed as described in Inspection Report 0941605.

To close this order, the principal contractor shall provide a policy for contractor co-ordination and communication on site at Bottom Brook.

REPORT:

Section 40(1)

Arrived onsite on March 8, 2017 at approximately 0930 hours with fellow Officer Darren Kavill. The purpose of this visit was to complete an inspection of the work site. Upon arrival we met with [REDACTED] HSE Advisors with ABB. We were accompanied during the inspection by Mr. [REDACTED] of Cahill as well as representatives from Emera NL [REDACTED] Field Safety Advisor and [REDACTED] Site Supervisor also took part in the site visit. We were assisted by [REDACTED] Site Supervisor with Stark International. Section 40(1)

The following was noted at the time of inspection and orders issued:

1) Both workers were wearing dark blue coveralls which did not meet high visibility apparel requirements.

2) Stairs being used to access the work trailer were not fitted with a hand rail as required.

3) The work area was at T1 Transformer. There is an opening that is less than four feet deep surrounding the area next to the work trailer. The area was not effectively delineated at the time of this inspection. There was also an unsecured cover over a sump hole.

4) While hearing protection was available inside the work trailer, there was no sign posted indicating hearing protection was required.

5) Due to trip hazards and limited space in the work area, housekeeping was required.

There were 5 orders issued to Stark International as a result of this inspection.

Stark International has been identified as a contractor of Cahill Fabrication Structural Limited who is a contractor of ABB Inc. Cahill Fabrication Structural Limited and ABB Inc. will receive a copy of this report as a result.

Emera Newfoundland and Labrador has been identified as the principal contractor for the work described in this report. As principal contractor, Emera Newfoundland and Labrador is responsible for ensuring compliance with the Newfoundland and Labrador Occupational Health and Safety Act and Regulations. As a result, Emera Newfoundland and Labrador will receive a copy of this report.

A copy of this inspection/order report must be provided at the earliest possible opportunity to your OHS Committee, Worker Representative or Workplace Designate.

TAKE NOTICE THAT YOU ARE TO COMPLY WITH THE FOLLOWING ORDER(S) ISSUED UNDER AUTHORITY OF THE OCCUPATIONAL HEALTH AND SAFETY ACT, REVISED STATUTES OF NEWFOUNDLAND AND LABRADOR 1990, CHAPTER 0-3 AS AMENDED AND REGULATIONS PASSED PURSUANT THERETO.

ORDER: 0941613-01

REGULATION: Part VII - Personal Protective Equipment
81 - High visibility apparel

A worker whose duties are regularly performed in areas and under circumstances where he or she is exposed to the danger of moving vehicles or heavy equipment shall wear distinguishing apparel containing highly visible material suitable for daytime or night time use, as appropriate.

TO WIT:

The employer shall ensure high visibility apparel of an appropriate class and level is worn by a worker where the worker is exposed to the danger of moving vehicles. Three colours can be used: red, orange-red, or yellow-green.

Noted on site at the time of inspection was two workers who were wearing dark blue outerwear with reflective stripes.

The Government of Newfoundland Service NL Occupational Health and Safety explanation guide can be referenced to assist an employer in determining the class and level of high visibility apparel required for this task. The explanation guide can be found here (Please see section E81 High Visibility Apparel): http://www.servicenl.gov.nl.ca/ohs/guide/part_vii.pdf

This Order shall be carried out on or before: MAR 14, 2017

ORDER: 0941613-02

REGULATION: Part XXII - Access and Egress
460 1-a Stairs

A flight of stairs with more than 4 risers shall be equipped with handrails as follows: on all open sides of stairway;

A copy of this inspection/order report must be provided at the earliest possible opportunity to your OHS Committee, Worker Representative or Workplace Designate.

MAR 8, 2017

TO WIT:

The employer shall ensure that handrails are installed on the work trailer stairway. Handrails were available on site at the time of this inspection but were not installed.

This Order shall be carried out on or before: MAR 14, 2017

ORDER: 0941613- 03
REGULATION: Part V - General Health & Safety Require
30 2- Openings, pits and tanks

A hole or pit in a floor, roof, walkway or work area accessible to a worker shall be securely covered and identified.

TO WIT:

The employer shall ensure work areas where openings are present are appropriately identified/marked/delineated. For example, the depression and sump are around T1 transformer.

This Order shall be carried out on or before: MAR 14, 2017

ORDER: 0941613- 04
REGULATION: Part VI - Occupational Health Requiremen
68 5- Noise hazards

An employer shall post and maintain signs at entrances to or on the periphery of areas where persons are exposed to high noise levels in excess of the threshold limit.

TO WIT:

There was no "hearing protection required" sign at or near the entrance to the Stark work trailer. The employer shall ensure "hearing protection required" signage is posted.

This Order shall be carried out on or before: MAR 14, 2017

ORDER: 0941613- 05
REGULATION: Part VI - Occupational Health Requiremen
67 -d Sanitary and orderly conditions

Carol,

Further to our telephone conversation on Friday, March 17, 2017 with respect to the above, we are still in the process of gathering information and documentation relative to both Orders. In that regard, we request an extension until Wednesday, March 22, 2017, to submit our response to close out these orders.

Please advise if this is acceptable.

Thank you,
They specifically want to discuss 0941610-01 but I imagine 0941615 will also come up... Conference call numbers below.

TAKE NOTICE THAT YOU ARE TO COMPLY WITH THE FOLLOWING ORDER(S) ISSUED UNDER AUTHORITY OF THE OCCUPATIONAL HEALTH AND SAFETY ACT, REVISED STATUTES OF NEWFOUNDLAND AND LABRADOR 1990, CHAPTER 6-3 AS AMENDED AND REGULATIONS PASSED PURSUANT THERETO.

ORDER: 0941610- 01

REGULATION: Part III - General Duties

19 2- Co-ordination of work

A principal contractor shall ensure work schedules and tasks are organized to provide safe working conditions for workers.

TO WIT:

The principal contractor shall ensure work schedules and tasks are organized to provide safe working conditions for workers. Access throughout the work site including to and from buildings on site must be maintained at all times. Where access must be changed due to work being completed, all contractors on site must be notified of the same.

Noted on site at the time of inspection was congestion on the work site, especially around the roadway used to travel through the site. Also, see Inspection report 0941605 issued to Dexter Construction Company Limited, order # 03. It was said that access to the building was changed with very little notice early on the day of March 8, 2017. Access to one doorway was removed due to excavation work being completed outside the north-west end of the building. The west access door path of travel was partially obstructed as described in Inspection Report 0941605.

To close this order, the principal contractor shall provide a policy for contractor co-ordination and communication on site at Bottom Brook.

This Order shall be carried out on or before: MAR 20, 2017

ORDER: 0941610- 02

A copy of this inspection/order report must be provided at the earliest possible opportunity to your OHS Committee, Worker Representative or Workplace Designate.
A conference call took place on March 14, 2017 at approximately 1100 hours. The purpose of the call was to discuss adverse weather conditions protocols at the Bottom Brook site. Attendees to the call were:

- Director, Safety, Emera Newfoundland and Labrador
  Construction Lead, NL

- Bottom Brook Site Manager, ABB Inc.
- Health and Safety Manager, ABB Inc.

Darren Kavli - Manager, OHS, Western, ServiceNL
Carol Alexander - OHS Officer, ServiceNL

The Corner Brook Office of Occupational Health and Safety received multiple complaints from early Saturday through Sunday regarding highway, road and site conditions leading to and at the Bottom Brook site and that work had not been canceled for the day. Blizzard conditions had been forecasted for most of the Island over the weekend, including the West Coast.

Through discussion with ABB and Emera, it was found that the contractors on site decided to leave early afternoon on Saturday and the nightshift was canceled. Work was carried out as scheduled on Sunday.

It is the responsibility of employers to ensure workers are aware of adverse weather conditions policies and procedures and to ensure communication is maintained with all workers regarding the same. Consideration has to be given to, among other things, weather forecast, highway driving conditions reports, local weather conditions, job tasks to be performed. Despite workers having some responsibility to make decisions concerning their attendance at the job site, it is the employers responsibility to reasonably ensure the safety of the worker and for assigning responsibility for making decisions regarding shutting down work due to poor weather. Accommodations for workers in the event they are not able to safely leave site must be available, i.e. food, shelter, first aid and other emergency supplies. Using a risk assessment, the worse case scenario must be used in determining equipment, training and personal required.

A clearer policy regarding adverse weather conditions is required. All parties on the call agreed to have a follow up meeting and provide feedback to Occupational Health and Safety after.

There is one order issued as a result of this inspection.

A copy of this inspection/order report must be provided at the earliest possible opportunity to your OHS Committee, Worker Representative or Workplace Designate.
A copy of this inspection/order report must be provided at the earliest possible opportunity to your OHS Committee, Worker Representative or Workplace Designate.

TAKE NOTICE THAT YOU ARE TO COMPLY WITH THE FOLLOWING ORDER(S) ISSUED UNDER AUTHORITY OF THE OCCUPATIONAL HEALTH AND SAFETY ACT, REVISED STATUTES OF NEWFOUNDLAND AND LABRADOR 1690, CHAPTER 0-3 AS AMENDED AND REGULATIONS PASSED PURSUANT THERETO.

ORDER: 0941615-01

ACT: Occupational Health and Safety
10 - Duty of principal contractor

A principal contractor engaged in a project shall ensure, where it is reasonably practicable for him or her to do so, that employers, workers and self-employed persons performing work in respect of that project comply with this Act and the regulations.

REGULATION: Part III - General Duties
14 6 - General duties of employers

An employer shall ensure, so far as is reasonably practicable, that work procedures promote the safe interaction of workers and their work environment to minimize the potential for injury.

TO WIT:

The employer shall ensure adverse weather conditions policies and procedures are established and implemented for the Bottom Brook site.

Emera shall ensure this is communicated site wide.

This Order shall be carried out on or before: MAR 15, 2017

A copy of this inspection/order report must be provided at the earliest possible opportunity to your OHS Committee, Worker Representative or Workplace Designate.

Hello [REDACTED]

Further to our discussion on site at Bottom Brook today, please see below for clarification on toques/baseball caps/hoodies/balaclavas under hardhats.

Our explanation guide for safety headgear can also be found on our website at:

If you have any questions, please contact me at your convenience.

Regards,
Carol

Carol Alexander, CHSC

P.O. Box 2006
Hi Carol,

Denis has asked that I respond to your enquiry.

In short,
- ball caps are *never* permitted to be worn under hard hats,
- hoodies (as in sweat shirt hoods) and/or rain coat hoods should not to be worn over or under hard hats unless the hard hat manufacturer indicates that the specific hood and specific hard hat are compatible and outlines how they are to be worn together,
- liners or toques/caps are not to be worn in conjunction with hard hats unless the hard hat manufacturer indicates that exact type of hat, toque, cap or liner is permitted to use with a specific model of hard hat, AND
- close fitting and thin head coverings such as bandanas, handkerchiefs, bouffants (hairnets), or welder's caps may be permitted to be worn under a hard hat if it can be worn smoothly and without bunching on the top of the head, and provided the hard hat manufacturer documents this is ok and that wearing the item in question under/with the hard hat does not compromise the hard hat's required/designed protection nor is its certification.

RE: GOVERNMENT OF NEWFOUNDLAND AND LABRADOR SERVICE NL OCCUPATIONAL HEALTH AND SAFETY INSPECTIONS BRANCH INSPECTION/OFFICER'S REPORT 0941510 AND ORDER 0941610-01

Dear [Name]

I write in relation to Report 0941510 issued to NSP Maritime Link Inc., operating under the name Emera Newfoundland & Labrador ("ENL") and Order 0941610-01 (the "NL OHS Order").

The NL OHS Order provides as follows:

The principal contractor shall ensure work schedules and tasks are organized to provide safe working conditions for workers. Access throughout the work site including to and from buildings on site must be maintained at all times. Where access must be changed due to work being completed, all contractors on site must be notified of the same.

Noted on the site at the time of inspection was congestion on the work site, especially around the roadway used to travel through the site. Also, see Inspection report 0941605 issued to Dexter Construction Company Limited, Order #3. It was noted that access to the building was changed with very little notice early on the day of March 8, 2017. Access to one doorway was removed due to excavation work being completed outside the north-west end of the building. The west access door path of travel was partially obstructed as described in Inspection report 0941605.

To close this order, the principal contractor shall provide a policy for contractor co-ordination and communication on site at Bottom Brook.

As owner of the Maritime Link Project, NSP Maritime Link Inc., operating under the name Emera Newfoundland & Labrador ("ENL") is responsible to ensure, where reasonably practicable, that employers, workers and self-employed persons comply with the Occupational Health & Safety Act.
March 22, 2017

and its regulations. Inspection/Officer’s Report 0941610 and Order 0941610-01 issued to ENL on March 8, 2017 requires ENL to ensure compliance with the NL OHS Order.

Effective August 21, 2015, ENL turned over the Bottom Brook Site (the “Site”) to ABB Inc., who assumed responsibility for the care, custody and maintenance of the Site in accordance with the agreement between the parties (see correspondence MLP-CP-LET-0069 dated August 21, 2015 attached hereto). Therefore, as of August 21, 2015, ABB Inc. was primarily responsible for the carrying out of its work at the Site, including coordination of activities with other contractors, and is responsible for managing work schedules and tasks at the Site and to provide safe working conditions for workers.

Further to the above, ABB Inc.’s contract with ENL provides as follows:

Article 4.7 Contractor shall cooperate with Company’s Other Contractors and Company Personnel working at the Site with a view to reducing interference with Company’s Other Contractors and Company Personnel or with the operations of Company, as further set forth in Article 8 and Exhibit 4 – Coordination Procedures.

Article 4.16 Contractor shall take such action as Company may specify to enable Company to comply with all Applicable Laws to be complied with by Company, and in particular, Applicable Laws governing the use of local personnel, goods and services which are in effect or which may come into effect during the terms of this Agreement.

We have been advised by ABB Inc. that changes with respect to work schedules and tasks at the Site are discussed by ABB Inc. and its subcontractors each day at the 3:00 p.m. meeting and then are communicated to workers the following morning at the morning toolbox meetings. In addition, we have been advised by ABB Inc. that, for example, where access to a building is changed, the areas with prohibited or restricted access are taped and identified. Red tape indicating prohibited access and yellow tape indicating restricted access. Finally, we understand that with respect to the congestion on the roadway utilized to travel through the Site, which is referenced in OHS Order 0941610-01, spotters are assigned as necessary to safely direct traffic at the point of congestion in order to ensure safe passage of vehicles through the congested area.

Please ensure that work schedules and tasks are organized to provide safe working conditions for workers. Further, please ensure that access throughout the work site, including to and from buildings on site, are maintained at all times and that where access must be changed, due to work being completed, all contractors on site are notified of the same. In order for ENL to ensure compliance with the NL OHS Order, we request that you immediately provide a written report to ENL confirming actions taken to ensure the above, including copies of any written policies or procedures confirming same.

At ENL, safety is the highest priority and ENL has and will continue to take all reasonable steps to protect the safety of its employees, contractors and the public. As a contractor on the Project, ABB Inc. is obliged to comply with the Occupational Health & Safety Act and its regulations and is
March 22, 2017

contractually obligated to support and achieve ENL's safety standards and requirements. Failure to do so constitutes a breach of contract and possible removal from the site.

Thank you for your continued cooperation in this matter.

Yours truly,

REPORT:

Arrived onsite with fellow OHS Officer Aiden Browne to complete an inspection of the Granite Canal Maritime Link project. We met with Emerg Safety [REDACTED] of Powertel Safety to complete inspections of several sites along this section of the project.

An inspection was completed of Structure 247 and we met with Powerline Technician [REDACTED] to inform him of our presence. At this location there were two workers working at heights to complete work on the installed line. It was explained that the line was properly grounded and one of the workers was a registered apprentice, working with another journey person. A discussion took place with regards to recent training and it was explained that update polices are available in the nearby work truck. Mr. [REDACTED] provided rescue gear and it was kept clean and in a storage tote bag. Additional rescue equipment was available in the aerial lift truck. It was also explained that all workers at the site has completed first aid training. Prior to leaving the site a review was completed of the field level risk assessment was completed, which was completed previously by the on site crew.

No orders issued at this site.

REPORT:

Arrived onsite with fellow OHS Officer Aldon Brown to complete an inspection of the Granite Canal Maritime Link project. We met with Emera Safety Manager, [redacted] who is an Environmental Monitor and [redacted] of Powertel safety to complete inspections of several sites along this section of the project.

At this time we met with maintenance workers who were completing maintenance work at the lay down area, located at the entrance to the dikes. A review of their field level risk assessment was completed and a discussion took place with operations at this site. It was explained that both mechanics and the Powertel Technician all have fall protection in this province and first aid completed. There were no concerns and a number of different work practices were discussed. It was explained that the maintenance workers do not work alone when completing any significant repair or maintenance projects while in the field.

No orders issued at this site.

Arrived onsite with fellow OHS Officer Alden Browne to complete an inspection of the Granite Canal Maritima Link project. We met with Emerg Safety [**redacted**] who is an Environmental Monitor and [**redacted**] of Powertel Safety to complete inspections of several sites along this section of the project.

I met with Paramedic [**redacted**] to discuss operations at the site and his responsibilities. It was explained that this is his second stint at this location and is primarily located on the laydown area at the entrance to the dike. There is radio communication for all the sites and crews along with communication at the end of each shift to ensure that he is the last to leave the site. to ensure that no crews are left behind without a responder. A discussion took place with regards to rescue equipment and a review of the equipment was completed in the rear of the unit. During this review it was observed that the fire extinguisher has not been serviced by the annual inspection, therefore it will be required to be replaced or inspected.

During discussion it was also explained that during the orientation process there has been no onsite visits or travel past the beginning of the dike. There will be a requirement to ensure that all paramedics at this site is well instructed to the site locations, including a minimum area visits to ensure familiarity to the project and all possible locations.

Orders report is attached.

REPORT:

Arrived on site with fellow OHS Officer Alden Browne to complete an inspection of the Granite Canal Maritime Link project. We met with Emmer Safety who is an Environmental Monitor and of Powertel Safety to complete inspections of several sites along this section of the project.

At this time we met with Supervisors and reviewed the field level risk assessment and it was observed that workers were preparing to complete line tensioning at this site and were setting the site. Workers were setting a grounding mat and other prep work. There was also a crane located on the site and a discussion took place with the operator. Load charts were available and cable slings were located on the deck of the crane. There is a busted window on the lower portion of the window that will be required to be replaced and there was a damaged sling located on the ground. The employer is also reminded of the importance of proper storage of lifting slings and straps, especially synthetic slings. These should always be stored inside containers, job boxes or hung in storage locations out of the weather when not in use. There was a pickup truck also left idling without the secondary park brake placed on or the wheels chocked. The pads under the leg supports of the tensioning unit was also poorly constructed and will be required to be reviewed and replaced with a more appropriate pad. There were also yellow fuel cans observed at the site that are required to be placed on secondary containment.

Orders report is attached.

REPORT:

Arrived onsite with fellow OHS Officer Aidan Browne to complete an inspection of the Granite Canal Maritime Link project. We met with Energy Safety [REDACTED] who is an Environmental Monitor and [REDACTED] of PowerTel Safety to complete inspections of several sites along this section of the project.

At this time we met with [REDACTED] and his crew who were preparing to complete line a pole climbing operations and were plumbing a section on Structure 289. At this time a discussion took place with workers around pole rescue and general practices at this location. An inspection of the three sets of pole climbing gear was completed and annual inspections had been completed of all sets. There is a concern with one of the Protec tape as it appeared to have white electrical tape on the manufactured joints. It was explained by the user of the unit that it came like that from the manufacturer. There will be a requirement to gain clarification from the manufacturer to ensure that this is indeed the case. In the interim the unit will be required to be taken out of service until verification can be obtained.

The employer will also be required to complete an assessment of its bathroom locations as the closest portable toilet from this location is approximately 8 km away positioned on the dike. During this assessment the employer will also be required to ensure that wet wipes or similar antiseptic solution and bathroom paper is available.

A discussion also took place regarding the crane at this site as it did not have a anti-two block installed on the unit. There may be further correspondence or orders issued at a later date as additional information will be required to be reviewed. As part of this review, the employer will be asked to provide a copy of the annual inspection of this unit.

Orders report is attached.

TAKE NOTICE THAT YOU ARE TO COMPLY WITH THE FOLLOWING ORDER(S) ISSUED UNDER AUTHORITY OF THE OCCUPATIONAL HEALTH AND SAFETY ACT, REVISED STATUTES OF NEWFOUNDLAND AND LABRADOR 1990, CHAPTER 0-3 AS AMENDED AND REGULATIONS PASSED PURSUANT THERETO.

ORDER: 0951128- 01
REGULATION: Part X - Fall Protection
142 1-bil Fall arrest system

A fall arrest system that is provided in accordance with section 141 shall include a lanyard that complies with CSA Standard Z259.11 “Energy Absorbers and Lanyards”.

TO WT:
The employer shall ensure that the Proteca Lanyard with white electrical tape be removed from service until such time that verification from the manufacturer can be provided that indicates that the wrapping of the lanyard is acceptable or produced from the manufacturer.

This Order shall be carried out on or before: MAR 22, 2017

ORDER: 0951128- 02
REGULATION: Part VI - Occupational Health Requirements
61 2-I Toilet facilities

Sufficient and suitable toilet facilities referred to in subsection (1) include the following: the toilets shall be conveniently accessible to the workers at all times during work

TO WT:
The employer will also be required to complete an assessment of its bathroom locations throughout the Granite Canal Project. During this assessment the employer will also be required to ensure that wet wipes or similar antiseptic solution and bathroom paper is available in each portable unit.

A copy of this inspection/order report must be provided to your OHS Committee, Worker Representative or Workplace Designate.

Employer Co-Chair: N/A
Employee Co-Chair: N/A
Worker Rep/Designate: N/A

REPORT:

Arrived onsite with fellow OHS Officer Aiden Browne to complete an inspection of the Granite Canal Maritime Link project. We met with Emerg Safety [redacted] who is an Environmental Monitor and [redacted] of PowerTel Safety to complete inspections of several sites along this section of the project.

At this time an inspection of Structure S2-010 was completed and we met with Supervisor [redacted] to discuss the process of their work scope. During our inspection it was observed that an excavator was removing material to dig a 2 ft trench around the structure and to tie in grounding wires for the site. We reviewed the field level risk assessment and it was explained that all workers had first aid training and overall the workers had no safety concerns. At this site and going forward all excavations are required to have the material removed from the excavation, at minimum 1.22 meters from the edge of the excavation. It was observed that the ground material was mixed with snow and ice, and was not pushed back from the edge of the excavation.

Orders report is attached

Arrived onsite with fellow OHS Officer Aiden Browne to complete an inspection of the Granite Canal Maritime Link project. We met with Enera Safety [REDACTED], who is an Environmental Monitor and [REDACTED] of Powerel Utilities to complete inspections of several sites along this section of the project.

An inspection was completed of several sites along the project with a number of issues discussed and orders written to Powerel Utilities and HSE Integrated. A copy of each inspection report is provided to Enera for their record and review. These inspections are:

Powerel: 0951124, 0951125, 0951117, 0951128 & 0951129
HSE Integrated: 0951125

As the Principal Contractor at this site, Enera shall ensure that all work completed at this site remains in compliance with the Occupational Health and Safety Act and Regulations. As such, documentation shall be forwarded to the OHS Division which indicates that compliance has been achieved with orders issued to contractors at this site, from the inspection reports that have been provided.

Orders report is attached.

Hi Carol,

I'm attaching a table with all the directives and their respective numbers stating current status. Our client requires a definitive response from OH&S stating that these items have been taken care of and are all in the "closed" status. Could you please respond to my email, thus satisfying this requirement.

Cheers

ABB HSSE Advisor
Power Systems Division
Good afternoon Gary and Alden

Hope all is well. Thank you for your visit to our Granite Canal site yesterday. Based on your debriefing, below is a list of deficiencies that you folks identified during your inspection and what we’ve done to correct it highlighted in red.

1. Out dated fire extinguisher on the medic’s truck. The medic was given a new up to date fire extinguisher before heading out to site this morning.

2. Concerns regarding the medic. We meet with the medic this morning from an orientation standpoint. Below is a list of what was communicated and understood: i). a run down on where the crews were located. ii). stress the importance of communicating with the crews from time to time throughout the course of the day to let them know of his whereabouts and where he will be stationed. iii). We informed him to station himself in the middle of the action. Right now he will be stationed at KM 134, now that the clipping in crews are done on that side of the dyke. iv). We made sure he had set of maps with all the access points and instructed him to travel the road from KM 134 to Victoria Control to familiarize himself with the access trails. v). Provided medic with a copy of our crew list (see attached).

3. Defective ratchet strap. The ratchet strap was what the workers had tied to their tool box. It was frayed. The crew cut it up and disposed of it during the inspection.

4. Pickup truck left unattended idling without parking brake applied or wheels being chalked. This issue was addressed at this morning’s tailboard. Staff was informed and instructed that while vehicle is left unattended and idling the vehicle’s parking brake must be applied/set or the wheels must be chalked to prevent any accidental movement. (see attached tailboard).

5. Lower window broken on unit # 755. The window has been ordered.

6. Lanyard with taped splices. The employee said it came from the supplier like that. I spoke with supplier this morning to confirm and the splices are taped to protect them. Attached is a picture of the same lanyard. You can visit capitaisafety.com and enter part # 1385101 to verify.

7. Unit # 747 anti-two block on the winch line. It’s a Radial Boom Derrick (RBD) TEREX General not a crane. It falls under the Digger Derricks and ANSI A10.31. It does not fall under the 2-150 for cranes. Digger Derricks are exempt from the requirements of Z-150. Attached is a copy of the annual inspection for unit 747.

8. Toilets were cleaned out today. Tomorrow, toilet located at KM 117 will be moved across the dyke to KM 138.
9. Excavated material to close to the edge of the trench. Operators were reminded of the legislated requirement that excavated material must be piled a minimum of 1.2 meters away from the edge of the trench.

10. Support under the trailer jack of the Tensioner. The ¾ inch plywood that was used to support the trailer jack of the tensioner was replaced with 6" x 6" block.

Regards

POWERTEL

**COMMENTS:**

- Boom is dry, jerky operation when extended.
- Unit passed inspection
- Stickers applied

*INSPECTED TO REG. 83/80, Sec. 51; 213/91, Sec. 116; and CSA 223 - M85000*

Section 40(1)
## Safety Topic:

Review OH&S visit

Pickups left unattended and idling must have the parking brake set or the wheels chocked.
In warmer weather vehicles should be shut off.

Toilet located at KM 117 will be moved across the dyke to KM 138.

Material excavated from trenches must be piled at least 1.2 meters from the edge.

Good afternoon,

Unfortunately due to a personal issue I will not be able to get the reports out to you today. I do not have a contact for Kevin or Harris, so can you please provide them with this update. Also, I do not have a contact for HSE, is it possible to provide one to me, also to inform them of our inspection yesterday.

I will have all reports submitted to you all from Aiden my visit from yesterday, prior to noon tomorrow.

Thanks and I certainly appreciate your understanding.

Worker Rep/Designate: Unknown  

REPORT:  

The following was noted at the time of inspection and orders issued:  

1) During the inspection, we visited the L2 Cooling Tower Foundation area. There were metal posts sticking up approximately 1 foot high in this area. The posts were not guarded.  

2) A worker was observed in a trench that was more than 1.22M in depth where improper trenching techniques were observed. The worker was asked to leave the area (stop work order issued).  

3) The area outside the west access door to the main building was observed to be in an unsafe condition. Material has been partially removed from the area, a loose board with protruding nails was in place at the bottom of the door frame and a generator and cords were partially obstructing the exit pathway outside the door.  

4) The access panel was open on Magnum light plant 9M4168. The plant was running at the time of observation and was being used to power a forklift being used to heat lift material.  

At approximately 1415 hours, the Underigned and Officer Kavli were leaving site when we observed a tandem truck, license plate CXV 372, parked in a quarry area near the Trans Canada Highway access to the Bottom Brook HVDC Converter Station. The box of the truck was elevated and workers were performing maintenance on the equipment.  

5) A stop work order was issued for work being performed where the body of the worker was under the elevated box and the box was not secured against inadvertent movement.  

6) The wheels of the equipment noted above were not chocked.  

7) The operator was not wearing high visibility apparel. High visibility apparel was available to the  

A copy of this inspection/order report must be provided at the earliest possible opportunity to your OHS Committee, Worker Representative or Workplace Designate.
worker but given the environmental conditions, the high vis had been removed so that it was not heavily soiled by mud, etc. from the equipment being maintained (greased). Rain gear provided was not of high vis material. Equipment/workers from another contractor were operating in the area.

There were seven orders issued to Dexter Construction Company Limited as a result of this inspection.

Dexter Construction Company Limited has been identified as a contractor of Cahill Fabrication Structural Limited who is a contractor of ABB Inc. Cahill Fabrication Structural Limited and ABB Inc. will receive a copy of this report as a result.

Emera Newfoundland and Labrador has been identified as the principal contractor for the work described in this report. As principal contractor, Emera Newfoundland and Labrador is responsible for ensuring compliance with the Newfoundland and Labrador Occupational Health and Safety Act and Regulations. As a result, Emera Newfoundland and Labrador will receive a copy of this report.

A copy of this inspection/order report must be provided at the earliest possible opportunity to your OHS Committee, Worker Representative or Workplaces Designate.
