July 31, 2013

Dear [Redacted]

Re: **Your request for access to information under Part II of the Access to Information and Protection of Privacy Act (NR/11/2013)**

On May 17, 2013, The Forestry and Agrifoods Agency received your request for access to the following records/information:

*Any and all communications between the Department of Natural Resources and the Department of National Defense in relation to the May 25, 2012 forest fire that started in a wooded area near Canadian Forces Base Goose Bay. Should include any documentation submitted regarding the fire, including list of costs incurred by province associated with fire response.*

I am pleased to inform you that your request for access to these records has been granted in part.

Access to some of the information contained within these records has been refused in accordance with the exceptions to disclosure, as specified in the *Access to Information and Protection of Privacy Act* (the Act). All information refused is identified by section number. The following sections have been used:

23.(1) The head of a public body may refuse to disclose information to an applicant if the disclosure could reasonably be expected to;

(a) harm the conduct by the government of the province of relations between that government and the following or their agencies;

(i) the Government of Canada or a Province.
23.(1) The head of a public body may refuse to disclose information to an applicant if the disclosure could reasonably be expected to:

(b) reveal information received in confidence from a government, council or organization listed in paragraph (a) or their agencies.

30.(1) The head of a public body shall refuse to disclose personal information to an applicant where the disclosure would be an unreasonable invasion of a third party’s personal privacy.

Pages 11-16 and 30-33 are withheld in their entirety as a result of the above mentioned sections.

As required by subsection 7(2) of the Act, we have severed information that are excepted from disclosure and have provided you with as much information as possible.

Section 43 of the Act provides that you may ask the Information and Privacy Commissioner to review this refusal of access or you may appeal the refusal to the Supreme Court Trial Division. A request to the Information and Privacy Commissioner shall be made in writing within 60 days of the date of this letter or within a longer period that may be allowed by the Commissioner.

The address and contact information of the Information and Privacy Commissioner is as follows:

Office of the Information and Privacy Commissioner
34 Pippy Place, P.O. Box 13004, Stn. A
St. John’s, NL A1B 3V8
Telephone: (709)729-6309
Facsimile: (709)729-6500

In the event that you choose to appeal to the Supreme Court, you must do so within 30 days of the date of this letter. Section 60 of the Act sets out the process to be followed when filing such an appeal.

Please be advised that responsive records will be published following a 72 hour period after the response is sent electronically to you or five days in the case where records are mailed to you. It is the goal to have the responsive records posted to the Office of Public Engagement’s website within one business day following the applicable period of time. Please note that requests for personal information will not be posted online.

If you have any further questions, please feel free to contact the ATIPP Coordinator by telephone at (709)729-5726 or by email at rodhillyard@gov.nl.ca

Sincerely,

[Signature]

JAMES EVANS
Chief Executive Officer

RE: Fire # 603: Dakota, Labrador

Please find attached an investigation report on Fire #603 (referred to as the Dakota Fire) as carried out by the Department’s Forest Management District 19 staff. The investigation shows that DND is the “affected party” and as such, under the Department of Natural Resources’ Forest Fire Liability and Compensation Regulations, DND is responsible for their own fire suppression costs as well as those incurred by the Government of Newfoundland and Labrador (GNL).

I am attaching an invoice from the Department in the amount of $592,537.28 to cover GNL’s costs associated with the suppression of this fire. If you have any questions arising from the invoice, or attached reference material, please contact Mr. Colin Carroll, Regional Ecosystem Director, Labrador @ 709-896-3405 or myself at 637-2349.

Sincerely;

Eric Young, P.Eng., RPF
Director
Forest Engineering & Industry Services

cc: Eric Earle, DNR-FEIS
Colin Carroll, DNR-Labrador Region

Fire 603: Dakota

May 25, 2012

Ralph Blake – Fire Investigator
Craig Cady – District 19 Manager
Derek Leboufson – Regional Compliance Manager
Steve Michelin – Regional Fire Protection Specialist

November 9, 2012
Fire Investigation Report
Forestry Services Branch
Labrador Region

Introduction

On May 25, 2012 at 11:40 am a wildfire was reported to the Forest Management Center in North West River. This fire was reported as being located on the Canadian Forces Base 5 Wing Goose Bay. Forestry Services staff responded and confirmed the report, this fire was then assigned the Fire Number 603 and called the Dakota Fire. The fire had been set or near a sand pit located on the road to Dome Mountain. The ignition point was later determined to be located on Crown Land but quickly spread onto Department of Defense (DND) lands (Appendix I)

Sources of Information

Please see Appendix II for all dispatch radio logs, Fire scene observations and Statements from first responders.

Fire Call Data

Forestry staff from Forest Management District 19 responded to Fire 603 at 11:40am on May 25, 2012. This fire was called in by the tower at the airport. Several other calls reporting the fire came in immediately including the Base Fire Station personnel and general public. Forestry Staff are accustomed to making observations when responding to a wildfire incident in order to determine the origin, cause and risks associated with each fire. These may include things such as description of vehicles present, people on the scene, combustible or volatile materials present, weather and available fuels. In this sense the investigation of a wildfire begins the moment a call is received. Conservation Officer Ralph Riche was appointed as lead investigator on May 28th, 2012.

Fire Size/Weather Conditions

The Dispatch Log (Appendix II) indicates the time the fire was reported as 11:40 am. The origin of the fire was easily surmised as the Sand Pit located on the road to Dome Mountain/Pine Tree (Approximately 53.314785°, -60.493°). This was evident from the tell tale "V" pattern (see Appendix III) produced by wind driven wildfires. Typically the fire will spread in a "V" pattern from the ignition site following the direction of the wind and widening as it travels. Also, Forestry staff noted the presence of individuals later determined to be Search and Rescue staff who were actively engaged in attempting to put out the fire near the pit. Response time of our crews was quick as staff was attending helicopter training nearby at Universal Helicopters hanger, suggesting the Search and Rescue personnel were on scene when the fire began.

Initial reports from staff on the scene indicate the fire was gaining momentum and speed at the time of their initial assessment. Also noteworthy is the report that the fire was "spotting" up to 300 m ahead of the front. This is an indication of extreme fire behavior and volatile fire weather conditions. Crews estimated the fire to be 500m in length and
100 m in width at the time they arrived on scene. The rate of spread was calculated to be 0.55 m per second at 13:55. This again indicates extreme fire behavior and volatile fire weather conditions.

Conditions that affected the rate of spread include the weather conditions, topography/slope, and fuel type. According to Environment Canada at 12:00 pm the temperature at the airport in Goose Bay was 30.4°C, 32% relative humidity, with a 39 km/hr wind coming from the West Southwest. These conditions continued throughout the day with temperatures eventually topping out at 32.6°C and winds from West Southwest at 24 km/hr at 3:00 pm. The combination of high temperatures, low relative humidity and high winds caused the fire to move rapidly once ignition occurred. The topography of the area is generally flat with no real natural breaks or barriers in the available fuels, such as large rivers or ponds. The fuel type present in the area of Fire 603 is known as “Spruce-Lichen Woodland” or C-1 fuel type. The Canadian Forest Fire Behavior Prediction System developed by Natural Resources Canada describes it as follows:

“This fuel type is characterised by open, parklike black spruce (Picea mariana (Mill.) B.S.P.) stands occupying well-drained uplands in the subarctic zone of western and northern Canada. Jack pine (Pinus banksiana Lamb.) and white birch (Betula papyrifera Marsh.) are minor associates in the overstory. Forest cover occurs as widely spaced individuals and dense clumps. Tree heights vary considerably, but both branches (live and dead) uniformly extend to the forest floor and layering development is extensive. Accumulation of woody surface fuel is very light and scattered. Shrub cover is exceedingly sparse. The ground surface is fully exposed to the sun and covered by a nearly continuous mat of reindeer lichens (Cladonia spp.), averaging 3-4 cm in depth above mineral soil.”

The above mentioned reindeer or caribou lichens are extremely susceptible to rapid moisture loss and can dry out rapidly when conditions are hot, dry and windy. This was the case for Fire 603, causing rapid spread and extreme fire behavior. The weather conditions, topography and fuel type at the sand pit on May 25, 2012 created an ideal situation for a fast-moving, intense forest fire with extreme fire behavior.

The Forestry Services Branch collects daily weather information in order to calculate the Fire Weather Index which gives a measure of risk and hazard presented by a forest fire given the local weather conditions. Below is the calculation for May 25, 2012:

<table>
<thead>
<tr>
<th>FMC</th>
<th>DMC</th>
<th>DC</th>
<th>HI</th>
<th>BUI</th>
<th>FWI</th>
<th>DMR</th>
</tr>
</thead>
<tbody>
<tr>
<td>91</td>
<td>13</td>
<td>32</td>
<td>13.6</td>
<td>13</td>
<td>16</td>
<td>4</td>
</tr>
</tbody>
</table>

Based on these above indices using the “Field Guide to Canadian Forest Fire Behavior Prediction (FFB) System” we could expect a fire to travel at approximately 39m/minute or 0.65m/second which is very similar to what was calculated above. This calculation is based on FFMc of 91, Wind speed of 39km/hr and BUI of 13. This type of fire and fire behavior was experienced during Fire 603 on May 25, 2012.
Investigation Procedures

Rapid response of Forestry Fire crews made the determination of the fire origin relatively simple. Crews were in the air very quickly once the fire was reported. The rear, flanks and front of the fire were evident from early on and suggested the sandy pit was the fire origin. The significant wind speed and consistent wind direction of that morning provided crews with great confidence in determining that the direction of spread was extending out from the sandy pit toward the North east (Appendix III/IV).

To pinpoint the most likely cause, one must first rule out other causes. Lightning can be eliminated as a probable cause of this fire based on weather and lightning strikes leading up to this fire. During the week of May 21, 2012 – May 25, 2012 there were 4 “Cloud to Ground (CG)” lightning strikes recorded by the Defense Weather Services on 5 Wing Goose Bay. Below is a list of these lightning strikes. Also see Appendix V for the mapped location of these lightning strikes, and email confirmation from base (Appendix VI).

Table 2: Lightning Strikes for week of May 21, 2012 – May 25, 2012 (times are in Greenwich Time.)

<table>
<thead>
<tr>
<th>Date</th>
<th>Time</th>
<th>Lat</th>

<td>17:45:44</td>
<td>53°19'48N</td>
<td>59°52'51W</td>
<td>CG</td>
</tr>
</tbody>
</table>

We can also rule out forestry activities as a source of this fire since there were none taking place at the location on May 25, 2012.

Ralph Riche requested statements from various first responders. Forestry personnel include Gordon Blake, Edwin Budgell and Steven Michelin, SHRC personnel included Jon C Lorimer and Tom Anthony. All individuals have similar accounts of the location of Fire 603, time the fire was reported, weather conditions and fire behavior. The statements confirm SAR techs at the scene of the fire. Steve Michelin’s statement indicated an individual at the scene of the fire admitting to having started the fire. John C Lorimer’s statement indicated the fire was started by a malfunctioning signal flare. All statements from these individuals can be seen in Appendix II.

Recommendations

After reviewing all statements given by Department of Natural Resources staff and other first responders and using local weather information and recorded lightning strikes we can determine that this fire was not caused by lightning or a forestry operation. Based on what was observed and statements given by Department of Natural Resources staff and first responders on the scene on May 25, 2012 near the point of ignition of Fire 603, we conclude that the fire was started by DND SAR Techs.
We are recommending the Department enact the appropriate legal protocol toward recovery of all fire suppression costs incurred for Wildfire #613 Dakota as per Section 6 of The Forest Fires Liability and Compensation Regulations (under the Forestry Act). All costs from this fire can be seen in Appendix VII.

WO Rowseel,

Once the Rangers arrive, could someone inform me with a list of names and ensure that they are dressed in uniform to incl CBT Boots.
Transport will pick them up at 1230hrs in the front of the mess hall and will take them to the staging area. They will get gloves and a nomex suit in that location from DNR. They are to report to Derrick Leboubon Cell # 897-7580.

Good day Darren,

I know you guys are really busy with all the fires lately but I am trying to finish my MP police report and need to know if DNR investigation is completed. If so can 34 MP Pl have a copy of the report, if not I need the following info clarified:

a. the grid location of where the fire started and confirm that was Provincial land;

b. DNR report file number for this incident;

c. my understanding that DNR interviewed the [redacted] Is this accurate or did they provide a verbal and written statement?

d. Estimated cost of the fire; and

e. I know you said DNR is not contemplating charges against the two individuals involved but I just need something official so I can put it in my report. A copy of the report or an e-mail response back from DNR to these questions would suffice.

Please let me know as soon as you get a chance or you can direct this e-mail to the DNR investigator for him to provide me the info.

Thanks in advance.

Good day Darren,

No I did not receive this info last week and thanks for sending it along.

I guess the only thing outstanding now is if charges are being contemplated and now that Mr Riche indicated that one individual involved has been in contact with him. I think it is very important to know who it is and the outcome of the information provided.

If you can provide me with that info it would be greatly appreciated.

Thanks once again for your assistance.
