September 29, 2017

Dear [Redacted],

Re: Your request for access to information under Part II of the Access to Information and Protection of Privacy Act [Our File #: SNL-081-2017]

On September 6, 2017, Service NL received your request for access to the following records/information:

"ATIPP requesting water test results for Mobile Central High School from school opening in 2008 to present."

I am pleased to inform you that a decision has been made by Service NL to provide access to the requested information. This includes the information Service NL has on file for water tests completed by Service NL officials at the Mobile Central High School. In addition, the tests that were completed at the school were bacteriological only. In accordance with your request for a copy of the records, these copies have been enclosed.

Please be advised that you may ask the Information and Privacy Commissioner to review the processing of your access request, as set out in section 42 of the Access to Information and Protection of Privacy Act (the Act). A request to the Commissioner must be made in writing within 15 business days of the date of this letter or within a longer period that may be allowed by the Commissioner.

The address and contact information of the Information and Privacy Commissioner is as follows:

Office of the Information and Privacy Commissioner
2 Canada Drive
P. O. Box 13004, Stn. A
St. John’s, NL A1B 3V8

Telephone: (709) 729-6309
Toll-Free: 1-877-729-6309
Facsimile: (709) 729-6500

You may also appeal directly to the Supreme Court Trial Division within 15 business days after you receive the decision of the public body, pursuant to section 52 of the Act.

Please be advised that responsive records will be published following a 72 hour period after the response is sent electronically to you or five business days in the case where records are mailed to you. It is the goal to have the responsive records posted to the Completed Access to Information Requests website within one business day following the applicable period of time. Please note that requests for personal information will not be posted online.
If you have any further questions, please feel free to contact me by telephone at 709-729-7437 or by email at ellenhaskell@gov.nl.ca.

Sincerely,

ELLEN HASKELL
ATIPP Coordinator

RE: MOBILE CENTRAL HIGH SCHOOL – MOBILE

Please be advised that the results of a bacteriological water sample taken February 7 2011 indicate that an “overgrowth- unable to interpret” was evident in your water supply. This may be due to the presence of excessive environmental bacteria in the sample that can interfere with the test.

As a result of this test a Boil Water Advisory must be issued for the school and an alternate source of water must be provided for staff and students for drinking and food preparation in the cafeteria.

Discussion with the custodian revealed that accurate monitoring of the disinfection system is not evident. This information must be collected daily and a log book of the results maintained. A disinfection system is a sophisticated system to rid potentially harmful bacteria however improper monitoring and maintenance has associated health hazards.

PRIVATE DRINKING WATER SUPPLIES SHOULD NOT BE TESTED WITHIN TWO DAYS (48 HOURS) AFTER CHLORINATION

1. Use only the special sterile bottles available from the Public Health Laboratory or Government Service Centre. Do not open the bottle until ready to collect the sample. Do not remove powder or rinse out bottle. Do not touch the inside of the screw-cap or the mouth of the bottle after cap removal.

2. Collect water sample for testing from a fixed tap. Do not collect sample from a leaking tap or a swing tap.

3. Remove filter/screen from the end of the tap. Clean the end of the tap with household bleach using a cotton swab or paper towel. Allow water to flow for about 5 minutes to clear service line. Reduce the flow and fill the bottle to indicator line. Replace cap securely.

4. Fill out the label on sample bottle and complete Part A of this form.

5. After collection, keep the sample refrigerated until delivery. Do not freeze. Submit samples within 30 hours of collection to the Public Health Laboratory 1st floor specimen drop off at the Miller Centre, Forest Road, St. John's. For residents outside the St. John's area, deliver the sample to the Government Service Centre in your area soon after collection. Samples older than 30 hours are not suitable for testing.

6. Routine water samples are accepted 8:30 a.m. to 3:30 p.m. Monday through Thursday at the Public Health Laboratory, St. John's. Residents outside the St. John's area should check with the nearest Government Service Centre for sample delivery hours. Samples cannot be accepted on Friday or on any day immediately preceding a public holiday. Reports will be mailed within 2 working days.

   • Samples from public water supplies, which include lakes and rivers, will not be accepted from private individuals.
   • The accompanying sample bottle is unsuitable for chemical analysis.

RE: MOBILE CENTRAL HIGH SCHOOL – MOBILE

Please be advised that the bacteriological water samples taken March 8 and 9, 2011 indicate satisfactory results.

As a result of this test a Boil Water Advisory can be lifted for Mobile Central High School.

Discussion with the custodian revealed that accurate monitoring of the disinfection system is now evident. This information must continue to be collected daily and a log book of the results maintained. A disinfection system is a sophisticated system to rid potentially harmful bacteria however, improper monitoring and maintenance has associated health hazards.
