March 19, 2018

Dear [Name]:

Re: Your request for access to information under Part II of the Access to Information and Protection of Privacy Act [File # NR-31-2018]

On February 20, 2018, the Department of Natural Resources received your request for access to the following records/information:

I am looking for all permits, correspondence and any other information available relating to a quarry adjacent to the fish plant in Bay De Verde. This quarry is on the back of the fish plant and is developed in a natural cliff face. I believe it was used by Weir's Construction and North-land Construction approximately 20 years ago. I am trying to get all history I can get concerning this quarry.

I am pleased to inform you that a decision has been made by the Department of Natural Resources, confirmed by the Deputy Minister, to provide access to some of the requested record. The records are attached.

I note that we have applied redactions to the least amount of information as possible (specifically personal information) and are relying upon section 40(1) for these redactions. Please see below for a description of this section:

S.40(1) The head of a public body shall refuse to disclose personal information to an applicant where the disclosure would be an unreasonable invasion of a third party's personal privacy.

As set out in section 42 of the Act you may ask the Information and Privacy Commissioner to review the department’s decision to provide access to the requested information. A request to the Commissioner must be made in writing within 15 business days of the date of this letter or within a longer period that may be allowed by the
Commissioner. Your request should identify your concerns with the department’s response and why you are requesting a review.

The request for review may be addressed to the Information and Privacy Commissioner as follows:

Office of the Information and Privacy Commissioner
2 Canada Drive
P.O. Box 13004, Stn. A
St. John’s, NL A1B 3V8

Telephone: (709) 729-6309
Toll-Free: 1-877-729-6309
Facsimile: (709) 729-6500

Pursuant to section 52 of the Act, you may also appeal directly to the Supreme Court Trial Division within 15 business days after receiving the department’s decision.

Please be advised that responsive records will be published following a 72 hour period after the response is sent electronically to you or five business days in the case where records are mailed to you. It is the goal to have the responsive records posted to the Completed Access to Information Requests website within one business day following the applicable period of time. Please note that requests for personal information will not be posted online.

If you have any questions, please feel free to contact me at 709-729-0463 or rhynes@gov.nl.ca.

Sincerely,

[Signature]

Attention: Felix Jones

Dear Sir/Madam,

QUARRY PERMIT APPLICATION REFERRAL NOTICE

This will acknowledge receipt of your application for a quarry permit with respect to the land situated at Next to Crab Plant, Bay de Verde.

Your application is being processed and has been referred to the following authorities:

The Town of Bay de Verde
Dept. of Mines & Energy, Gerald Kenney

In order to assist the above authorities in evaluating your application, it is necessary that you mark the corners and boundaries of the site being applied for. It is suggested you use flagging and post a sign(s) stating, "Site of Quarry Permit application."

The markings are to be removed if the application is not approved. You should hear further in the matter in about 30 days.

Yours truly,

Fred Kirby, P.Geo.
Manager, Quarry Materials

Ownership of land to the best of your knowledge: **(Crown) Private**

If Private, complete the following and attach a letter from the owner authorizing you to occupy the property for the purpose of removing quarry material.

**Name of Owner:**

**Address:**

**Phone No.:**

**Form of Title:**

Crown Grant, Date Issued, Volume, Folio

Crown Lease, Date Issued, Number

Other (Specify)
At the time of application, the site being applied for must be clearly marked on the ground using 2 x 4 posts, with a company sign and flagging to mark the corners, and to outline the area.

Is the site visible from nearby highways or main roads?  YES

Is there an existing access to the quarry site?  YES

Describe the type of vegetation cover over the area to be quarried (forest, scrub, barren, etc.)

Clear:

Describe marking if any in addition to the above required markings

Is the site being applied for an existing quarry?  YES  If yes, what are the dimensions of the quarry?

Width 50m  Length 50m  Average height of quarry faces 5m

Are there any structures (house, fence, pole line, etc.) within the boundaries of the quarry site?  NO

If yes, describe the structures and give their distance from the site.

Are there any brooks, rivers, ponds or streams within the boundaries of the quarry site?  NO

If yes, specify type of water body

Are there any brooks, rivers, ponds or streams within a 200 metre radius of the boundaries of the quarry site?  NO  If yes, specify type of water body and give its distance from the site

Is any of the land within a 300 metre radius of the boundaries of the quarry site being used?  YES

If yes, describe the land use and give the distance from the site  Fish Plant  approximately 100 metres
Describe the location of the proposed Quarry with reference to the UTM grid (NAD 1927) on the 1:50,000 Topographic Map. Description must include NTS Map Sheet, zone and the coordinates. The UTM co-ordinate should be taken at the entrance to the quarry.

368600 E 5326950 N Zone 22 Map Sheet 2102

Describe the location of the proposed Quarry with reference to nearby prominent landmarks (road intersections, bridges, etc.) to nearest tenth of a kilometre 1000 metres from:

The information in this section can be completed by using a Global Positioning System. Inaccurate information will cause delays.
SKETCH OF QUARRY SITE

In the space below, draw a sketch showing the boundaries and distance between corners of the site being applied for, outline of existing quarry if one exists, distances of all features within the quarry site and all features within a 300 metre radius of the boundaries of the quarry site. That is, the location of the features listed in Section 7 of this application. Also, show the proposed access to the site, the distance the quarry site is setback from the highways or main roads. The location where the UTM co-ordinates was taken should be shown.

I certify that the information contained in this application is correct.

Attention: David Mitchell  

Dear Sir/Madam,  

QUARRY PERMIT APPLICATION REFERRAL NOTICE  

This will acknowledge receipt of your application for a quarry permit with respect to the land situated at Next to Fish Plant, Bay de Verde.  

Your application is being processed and has been referred to the following authorities:  

The Town of Bay de Verde  
Federal Fisheries - St. John's  
Dept of Mines and Energy, Michelle White  

In order to assist the above authorities in evaluating your application, it is necessary that you mark the corners and boundaries of the site being applied for. It is suggested you use flagging and post a sign(s) stating, "Site of Quarry Permit application."  

The markings are to be removed if the application is not approved. You should hear further in the matter in about 30 days.  

Yours truly,  

Fred Kirby, P.Geo  
Manager, Quarry Materials  

P.O. Box 8700, St. John's, NF A1B 4J6 Ph: (709) 729-2773 Fax (709) 729-6782
INTERNAL MEMO

Referred: 22 May 2002
Permit Number: 110199
File Number: 7118476

To: The Manager, Quarry Materials

On May 22, 2002, we processed an application from Northland Contracting Inc. for a quarry permit with respect to 5 hectares of land situated Next to Fish Plant, Bay de Verde.

The result of processing the application is as follows:

- The Town of Bay de Verde: Approved subject to the stipulations
- Federal Fisheries - St. John's: Nothing received
- Dept of Mines and Energy, Michelle White: Nothing received

This application now requires your consideration.

From: Joanne Janes, Clerk IV, Quarry Materials

Please pass along.

Only issue permit for 4 months.
Add condition #12 of Town's scope.

Dear Sir:

Council has reviewed the application for quarry permit from Northland Contracting Inc. for a quarry
near the fish plant in Bay de Verde.

Council has approved this subject to the following stipulations:

a) That all materials required from this quarry be taken from that area approximately
200 meters from the Crab/Shrimp Plant.

b) That all materials taken from this quarry be used for project within the Municipality
of Bay de Verde.

c) That the Quarry Permit be for the duration of the project (approx. 4 months) and not
12 months as requested in the application.

Attention: David Mitchell

Dear Sir/Madam,

DRAFT PERMIT LETTER : PROVISIONAL NUMBER: 110199

Enclosed herewith you will please find a draft quarry permit, in duplicate, with respect to about 5 hectares of land situated at Next to Fish Plant, Bay de Verde.

Would you please sign both copies in the space provided, have your signatures(s) witnessed and return both documents to this office for execution by Government.

When returning the signed copies you should remit your cheque in the amount of $400.00 to cover the rental at $80.00 per hectare for the 5 hectare(s) involved in the permit.

You are advised to thoroughly read all conditions of this permit before signing. Any violation of any of the terms can lead to cancellation.

If the permits are not returned within six weeks of the date of this letter the application will be deemed to have been cancelled by you.

One copy will be returned to you for your files when the permit has been fully executed.

Yours truly,

Fred Kirby, P.Geo

Dear Sir/Madam,

STATUTORY RETURN FOR PITS AND QUARRIES
QUARRY PERMIT NUMBER 110199
Next to Fish Plant, Bay de Verde

Enclosed is a Production Report Form to be completed and returned to this Department. It is required as a condition of your permit or lease under the Quarry Materials Act, 1999 and under the authority of Section 7 of the Mining Act. The Production Report, along with the appropriate Royalty Payment, must be submitted within 60 days of expiry of the permit.

- The report must be filed even if there was no production.
- If you are reapplying for a Quarry Permit to this location for the year 2002, your application will be considered incomplete and will not be processed unless the production return and royalty payment are submitted.
- If we do not receive a complete and acceptable application from you for a new permit to this site within this 60 day period, the area will be available for application to other parties.

If you have any questions, please contact Joanne Janes at (709) 729-4044.

Yours truly,

Fred Kirby, P.Geo

Mr. David Mitchell
Northland Contracting Inc.
P. O. Box 307
Bay Bulls, NL A0A 1C0

Dear Mr. Mitchell:

During a recent review of Public Works and Government Services Canada contract data it was noted that Northland Contracting Inc. was awarded a contract for a breakwater in Bay de Verde.

From information obtained through written communication with Public Works Government Service Centre in St. John's it was noted that 25,272 cubic metres of quarry material was used in this project. During a review of your annual quarry returns I could find no evidence of a royalty payment for the material used. Therefore, a royalty payment is owed on the quarry material used totalling $7,581.75.

If you require further clarification, please do not hesitate to contact me at 709-292-4503 or Mr. Fred Kirby, Manager of Quarry Materials at 709-729-6447.

Sincerely,

William Oldford
Quarry Inspector

c. Fred Kirby
Fred,

I received this cheque via mail on Oct 26, 2005. The reference # is an invoice dated March 29, 2004 (see attached invoice #7,581.75). I will need to conduct an in-depth review of my files regarding the additional $1,410.77. We may also have an overlap in payments. Northland has been habitually slow in filing production returns/paying royalties so locating the exact file number for this royalty will take time. If you wish, place this cheque in file #71164-76 for now. If/when changes are needed I will let you know.

Regards,

W. A. Oldford.

Ownership of land to the best of your knowledge  ☑ Crown  ☐ Private

If Private, complete the following and attach a letter from the owner authorizing you to occupy the property for the purpose of removing quarry material; confirmation of title and ownership must be included.

Name of Owner ____________________________________________
Address ____________________________________________ Phone No. _________

Form of Title

Crown Grant , Date Issued , Volume , Folio
Crown Lease , Date Issued , Number
Other (Specify) ____________________________________________

At the time of application, the site being applied for must be clearly marked on the ground using 2 x 4 posts, with a company sign and flagging to mark the corners, and to outline the area.

Is the site visible from nearby highways or main roads? ☑ Yes ☐ No

Is there an existing access to the quarry site? ☑ Yes ☐ No

Describe the type of vegetation cover over the area to be quarried (forest, scrub, barren, etc.)

Rock  Bare

Describe marking if any in addition to the above required markings

________________________________________  ____________________________________________
Is the site being applied for an existing quarry? Yes. If yes, what are the dimensions of the quarry?

Width 50 M  Length 350 M  Average height of quarry faces 14 M

Are there any structures (house, fence, pole line, etc.) within the boundaries of the quarry site? No

If yes, describe the structures and give their distance from the site.

Are there any brooks, rivers, ponds or streams within the boundaries of the quarry site? No

If yes, specify type of water body

Are there any brooks, rivers, ponds or streams within a 200 metre radius of the boundaries of the quarry site? If yes, specify type of water body and give its distance from the site. No

Is any of the land within a 300 metre radius of the boundaries of the quarry site being used? Yes

If yes, describe the land use and give the distance from the site

Describe the location of the proposed Quarry with reference to the UTM grid (NAD 1927) on the 1:50,000 Topographic Map. Description must include NTS Map Sheet, zone and the co-ordinates. The UTM co-ordinate should be taken at the entrance to the quarry.

358600 E 5321700 N Zone 22 Map Sheet 2 C 2

Describe the location of the proposed Quarry with reference to nearby prominent landmarks (road intersections, bridges, etc.) to nearest tenth of a kilometre

Attention: Robert Giovannini

Dear Sir/Madam,

QUARRY PERMIT APPLICATION REFERRAL NOTICE

This will acknowledge receipt of your application for a quarry permit with respect to the land situated at Bay de Verde (Fish Plant).

Your application is being processed and has been referred to the following authorities:
- Government Service Centre - St. John's
- The Town of Bay de Verde
- Dept of Natural Resources, Mineral Devp, John Davis
- Federal Fisheries - St. John's
- Dept. of Mines & Energy, Gerald Kennedy

In order to assist the above authorities in evaluating your application, it is necessary that you mark the corners and boundaries of the site being applied for. It is suggested you use flagging and post a sign(s) stating, "Site of Quarry Permit application."

The markings are to be removed if the application is not approved. You should hear further in the matter in about 30 days.

Yours truly,

[Signature]

Memo To: Fred Kirby
From: Gerald Kennedy

Re: Rehabilitation inspection/complaint inspection of the BrownCo Investments Inc. site.

On October 19, 2006, both Fred Kirby and myself inspected the proposed RJG Construction quarry site located in Bay de Verde.

While on site we erected two posts with red flagging tape indicating the area where we feel the quarry activity should take place to minimize effects to nearby residents and business(s).

This site is approved by the Department of Natural Resources subject to the following conditions:
1. Written approval must be obtained from a minimum of 10 residents within 300 metres of the proposed quarry (see attached photo.)
2. Written approval must be obtained from the owner of Quinsea Fisheries. The reason for this approval is because there appears to be a water intake approximately 20 metres from the proposed quarry.
3. The operation must remain a minimum of 15 metres from the two sheds located in the area. As I have mentioned above, there are two posts with red flagging tape erected. All quarry activity must remain to the South of these posts. These two posts are 15 metres from the sheds in the area.

Pictures are attached.

Gerald Kennedy, B. Sc.
Quarry Inspector

Permit #115664, RJQ Construction

Dear Sir:

With reference to the above noted file, the Town of Bay de Verde approves the submitted application subject to the following conditions:

1. Quarry will start at the end of Quinlan Bros. garage and go south into "The Hole". Materials from the shelf at the beginning of the quarry to be used.

2. Materials to be used within the Town for this particular project.

3. Permit will be for the duration of this project only.

4. Any damage to personal or business property during this construction will be the responsibility of the contractor.

5. Blasting will be confined to the bottom of the cliff only.

Should you require additional information, please do not hesitate to contact us.

Yours truly,

Robert Giovannini
R.J.G. Construction Ltd.
P.O. Box 638
St. Lawrence, Newfoundland & Labrador
A0E2V0

Dear Mr. Giovannini:

Subject: Proposed works or undertakings are not in or near fish habitat.

Fisheries and Oceans Canada (DFO) received your proposal on October 25, 2006, concerning quarry operation near Bay de Verde. To expedite future correspondence or inquiries, please refer to your referral title and file numbers when you contact us.

Referral File No.: 06-HNFL-NA4-000-000216
Habitat File No.: 5300-4-2
Referral Title: Quarry Site - Near Bay de Verde

It is our understanding that your proposal consists of:

- Quarry operation near Bay de Verde

as outlined in the following plans:

- Request for Project Review received October 25, 2006

If the above plans have changed since the time of submission, the advice in this letter may no longer apply and you should consult with us to determine if further review is needed.

We have concluded that the proposed works are not in or near fish habitat and will not likely affect fish or fish habitat. No further review pursuant to the habitat protection provisions of the Fisheries Act is needed.

Please note that this letter of advice does not release you from the responsibility to obtain any other federal (for example, the Navigable Waters Protection Act), provincial,
territorial or municipal approvals. If you have any questions concerning the above, or if my understanding of the proposal is either incorrect, incomplete, or if there are changes to the proposed work, please contact myself directly by telephone at (709) 772-5597, by fax at (709) 772-2659, or by e-mail at FLEETT@DFO-MPO.GC.CA.

Yours sincerely,

Memo To: Hon. Kathy Dunderdale, Minister of Natural Resources

From: Kenneth C.M. Andrews, P. Geo., Director, Mineral Lands Division

Date: October 26, 2006

Re: RJJG Construction - Bay de Verde
Approval for a Quarry Permit within 300 m of a Residential Development.

Section 2(a) of the terms and conditions of a regular quarry permit states that "There shall be no quarrying within 50 meters of any roadway, waterbody or watercourse, nor within 300 metres of any residential development without the permission of the Minister in writing."

All the necessary approvals have been obtained from relevant referral agencies and approval has been obtained from all residential owners within 300 m of this site who could be contacted. The owners of three residential units could not be contacted since they work outside the province.

We have placed special conditions on this permit to address any issues that might arise as a result of quarrying at this location.

I would recommend the approval of this application.

Manager, Quarry Materials

CC: Government Service Centre - St. John's
I have been directed by the Honourable Minister of Natural Resources to submit this referral to you for your comments:

Applicant: RJG Construction
 Quarry Location: Bay de Verde (Fish Plant)
 Quarry Materials: Rock
 Area of site: 1
 NTS map sheet: 02C/02
 Electoral District: Trinity-Bay de Verde

The site is shown on the attached map. The applicant has a Quarry Permit to this location for 2007 and we anticipate that the applicant will apply for a permit to the site for 2008. To minimize delay in the processing of this application, we request that any comments or concerns regarding issuance of a permit for 2008, be forwarded by December 31, 2007.

If no reply is received by December 31, 2007 we will conclude you have no comment or concerns.

Would you kindly complete your reply below and return it to this division. Please attach additional sheets if necessary.

Fred Kirby, P.Geo
Manager, Quarry Materials

Comments/Concerns:

Since RJG Construction does not have a project currently approved in the Municipality of Bay de Verde, the Town Council objects to a quarry permit being issued to this Company.

Dear Sir/Madam,

**STATUTORY RETURN FOR PITS AND QUARRIES**

Quarry Permit #115564
Bay de Verde (Fish Plant)

Enclosed is a Production Report Form to be completed and returned to this Department. It is required as a condition of your permit or lease under the Quarry Materials Act, 1998 and under the authority of Section 7 of the Mining Act. The Production Report, along with the appropriate Royalty Payment, must be submitted within 60 days of expiry of the permit.

- The report must be filed even if there was no production.
- If you are reapplying for a Quarry Permit to this location for the year 2007, your application will be considered incomplete and will not be processed unless the production return, royalty payment and the $80.00/hectare rental fee are submitted.
- If we do not receive a complete and acceptable application from you for a new permit to this site within this 60 day period, the area will be available for application to other parties.

If you have any questions, please contact Joanne Jenes at (709) 729-4044.

Yours truly,

Fred Kirby, P.Geo.

STATUTORY RETURN FOR PITS AND QUARRIES

Production Report -2008

R.J.G. Construction
Bay de Verde (Fish Plant)

Report on production for the twelve months ended December 31. This report must be returned by March 3rd, 2008.

| Conversion Factors: 1 m³ = 2 tonnes | 1 m³ = 1.3 yd³ | 1 yd³ = 1.75 short ton |

1. Type of Operation
   - Bedrock Quarry
   - Till
   - Sand
   - Gravel
   - Peat

2. On Site Processing
   - Drilling & Blasting
   - Rippling
   - Crushing
   - Screening
   - Washing
   - Other

3. Total amount removed:

4. If a bedrock Quarry, type of material removed:
   - Granite
   - Trap
   - Marble
   - Sandstone
   - Limestone
   - Slate
   - Other

5. Material Sold or Used from the Permit/Lease
   Production should include material sold, or used in own fabrication/secondary processing.

   Do NOT Include:
   - Production by others under subordinate permit
   - Transportation costs.

   Include:
   - Material removed by yours or by others for under your direction.
   - Value of material as well as cost of drilling, blasting, crushing, screening, washing and loading.

NOTE: The dollar value of material sold and/or used should be the value of the product at the pit. For material used, a reasonable value would be the amount one might pay for such material if it was purchased at a pit or operation in the area.

Table A. Complete this table if not a Bedrock Quarry. If a Bedrock Quarry, go to Table B.

<table>

Dear Sir/Madam,

STATUTORY RETURN FOR PITS AND QUARRIES - PERMIT NUMBER 115664

Enclosed is a Production Report Form to be completed and returned to this Department. It is required as a condition of your permit or lease under the Quarry Materials Act, 1998 and under the authority of Section 7 of the Mining Act. The Production Report, along with the appropriate Royalty Payment, must be submitted within 60 days of expiry of the permit.

- The report must be filed even if there was no production.
- If you are reapplying for a Quarry Permit to this location for the year 2008, your application will be considered incomplete and will not be processed unless the production return, royalty payment and the $60.00/hectare rental fee are submitted.
- If we do not receive a complete and acceptable application from you for a new permit to this site within this 60 day period, the area will be available for application to other parties.

If you have any questions, please contact Joanne Janes at (709) 729-4044.

Yours truly,

Fred Kirby, P. Geo

Re: Renewal Application for Quarry at Bay de Verde

Dear Sir:

Please be advised the Town of Bay de Verde has objected to your renewal application.

The Town says "Since RJG Construction does not have a project currently approved in the municipality of Bay de Verde, the Town Council objects to a quarry permit being issued to this company."

A refund for the rental fee is currently being processed.

Yours truly,

Fred Kirby, P. Geo.

Referral Letter

File Number: 7117827  Current Permit Number: 131835  Referred: May 25, 2015

I have been directed by the Honourable Minister of Natural Resources to submit this referral to you for your comments:

Applicant: R.J.G. Construction
Quarry Location: Bay de Verde (Fish Plant)
Quarry Materials: Rock
Area of site: 1
NTS map sheet: 02C/02
Electoral District: Trinity-Bay de Verde

The site is shown on the attached map. The applicant has a Quarry Permit to this location for 2015 and we anticipate that the applicant will apply for a permit to the site for 2016. To minimize delay in the processing of this application, we request that any comments or concerns regarding issuance of a permit for 2016, be forwarded by December 31, 2015.

If no reply is received by December 31, 2015 we will conclude you have no comment or concerns.

Would you kindly complete your reply below and return it to this division. Please attach additional sheets if necessary.

Manager, Quarry Materials

Comments/Concerns:

Denied. The project no longer requires the use of this area.

Attention: Robert Giovannini

Dear Sir/Madam,

QUARRY PERMIT APPLICATION REFERRAL NOTICE

This will acknowledge receipt of your application for a quarry permit with respect to the land situated at Bay de Verde (Fish Plant).

Your application is being processed and has been referred to the following authorities:

The Town of Bay de Verde
The Town of Bay de Verde

In order to assist the above authorities in evaluating your application, it is necessary that you mark the corners and boundaries of the site being applied for. It is suggested you use flagging and post a sign(s) stating, "Site of Quarry Permit application."

The markings are to be removed if the application is not approved. You should hear further in the matter in about 30 days.

Yours truly,

Gerald Kennedy

QUARRY PERMIT APPLICATION

I/we

Address: Box 8421 Stn A
Postal Code: A1B - 3N9

Hereby apply for a quarry permit for _ hectares to expire December 31st, 2023 under the terms and conditions of the Quarry Materials Act, 1998, SNL 1998.

QUARRY HISTORY:
Have you had permits for this site previously? ☐ YES ☐ NO
If yes, please list the permit or file numbers associated with that site: 711-7827

Are you applying for a permit to the same area you held under permit last year? ☐ YES ☐ NO
If yes, please complete ONLY the following section.

QUARRY PERMIT RE-APPLICATION SECTION

File Number: ________________________ Previous Permit Number: ________________________

I certify that there are no changes or modifications to the size, boundaries or location of the existing quarry permit area or to the method of removal or processing planned at the location.

NOTE: If there are any changes to the size of the quarry, the method of removal or processing, a new application MUST be completed for the site.

Date: ________________________ Name: ________________________
Signature: ________________________ Position: ________________________

RECEIVED this _ day of _

CONTRACT INFORMATION:
Complete this section if the quarry material is required for a specific contract.

Agency Awarding Contract: PWSGC

Address: ________________________ Phone No.: ________________________
Contract No.: ________________________ Tender Closing Date: ________________________
Anticipated Starting Date: ________________________ Anticipated Completion Date: ________________________
Amount of material required:
Class A: ________________________ Class B: ________________________
Asphalt aggregate:______________________ Other (please specify): ________________________
Have you been awarded the contract? ☐ YES ☐ NO

LAND OWNERSHIP:
Ownership of the land, best of your knowledge: ☐ CROWN ☐ PRIVATE
If private, complete the following and attach a letter from the owner authorizing you to occupy the property for the purpose of removing quarry materials; confirmation of the title and ownership must be included.

Name of property owner: ________________________
Address of property owner: ________________________

Form of Title:
Crown Grant: Date Issued: ____________ Volume: ____________ Follo: ____________
Crown Lease: Date Issued: ____________ Number: ____________
Other (specify): ________________________
QUARRY INFORMATION:
For the purpose of removing:
☐ Sand
☐ Gravel
☒ Rock
☐ Borrow material
☐ Horticulture peat
☐ Stockpiled material
☐ Other (please specify)

The quarry operation will involve:
☐ Drilling and blasting
☐ Rippling
☐ Crushing
☐ Screening
☐ Washing
☐ Use of settling ponds
☐ Pit run removal
☐ Asphalt batch plant
☐ Concrete batch plant
☐ Other (please specify) __________________

NOTE: Topsoil removal is NOT permitted

Proposed end use of material: __________________
Location of end use material: __________________

SITE PREPARATION:
At the time of application, the site being applied for must be clearly marked on the ground with a company sign and flagging to mark the corners and to outline the area.

Is the site visible from nearby highways or main roads? ☐ YES ☐ NO
Is there existing access to the quarry site (e.g., road, trail)? ☐ YES ☐ NO
Describe the type of vegetation cover over the area to be quarried (e.g., forest, scrub, barren, etc.):

LAND USE INFORMATION:

• Is the site being applied for an existing quarry? ☐ YES ☐ NO
  if yes, what are the dimensions of the quarry? Width: __________ Length: __________ Average face heights: __________

• Are there any structures (e.g., house, fence, pole line) within the boundaries of the quarry site? ☐ YES ☐ NO
  if yes, describe the structures & give distances from the site:

• Are there any brooks, rivers, ponds or streams within the boundaries of the quarry site? ☐ YES ☐ NO
  if yes, specify type of water body:

• Are there any brooks, rivers, ponds or streams within 200 metres of the boundaries of the quarry site? ☐ YES ☐ NO
  if yes, specify type of water body and give distances from the site:

• Is there any land being used within a 300 metre radius of the boundaries of the quarry site? ☐ YES ☐ NO
  if yes, describe the land and give distances to the site:

LOCATIONAL INFORMATION:
Describe the location of the proposed quarry with reference to the UTM grid (NAD 1927) on a 1:50,000 topographic map.
Description must include NTS map sheet, UTM zone and the co-ordinates. List co-ordinates of each corner in the spaces provided below. Additional coordinates may be listed on an additional sheet and attached to this application.

NTS MAP SHEET (e.g., 01N/10): __________
UTM ZONE: 19 20 21 32

</tbody>
</table>

5. 6. 7. 8.  

Describe the location of the proposed quarry with reference to nearby prominent landmarks (road intersections, bridges, etc.) to nearest tenth of a kilometre: __________________
SKETCH OF QUARRY SITE

In the space below, draw a sketch showing the following:
- the boundaries and distance between corners of the site being applied for,
- outline of existing quarry (if one exists),
- distances of all features within the quarry site,
- all features within a 300 metre radius of the boundaries of the quarry site, including all features listed in the "Land Use Information" section of this application.
- the proposed access to the site and the distance the quarry site is set back from the highways or main roads.
- the location of where the UTM co-ordinates were taken.

Sketch map may be a detailed survey of the area of the permit, location of the permit on a detailed cadastral or forest inventory map; a detailed aerial photograph or a Google Earth Image.

I certify that the information contained in this application is correct.

From: Town Council [mailto:towncouncilbdv@persona.ca]  
To: geraldkennedy@gov.nl.ca

Send: June 2, 2015 7:14 PM  
Subject: RJG Referral Letter

HI Gerald,  
The Town approved with stipulations :) 

RESOLVE that the referral letter be returned advising the Town approves the application with the following stipulations:  
- the permit should be for the length of this phase of the project only,  
- no materials are to leave Bay de Verde,  
- their is to be minimal or no blasting due to the size of the Hazardous Material (Ammonia Tank) stored and utilized at the Fish Plant,  
- parking and access to the plant by motor vehicles is not to be obstructed in any form, and  
- the road accessing the quarry is to be located on the water side due to the fact that there are wells providing salt water to the fish plant on the cliff side.

Note: I will forward with your official letter tomorrow.

Cheers

Tara North, B. Comm.

Dear Sir/Madam,

QUARRY PERMIT LETTER: PERMIT NUMBER 131835

You will please find enclosed herewith duly executed Quarry Permit Number 131835 with respect to land situated at Bay de Verde (Fish Plant)

Also enclosed is the receipt(s) covering your payment(s) of the rental fee for the aboved mentioned land as follows.

<table>
<thead>
<tr>
<th>Receipt Number</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>57</td>
<td>105</td>
</tr>
<tr>
<td>Total</td>
<td>105</td>
</tr>
</tbody>
</table>

Please note that your permit expires on: 31-Dec-2015

Yours truly,

Gerald Kennedy
Manager, Quarry Materials
INTERNAL MEMO

Referred: 25-May-2015
Permit Number: 131835
File Number: 7117827

To: The Manager, Quarry Materials

On 25-May-2015 we processed an application from RJG Construction for a quarry permit with respect to 1 hectares of land situated Bay de Verde (Fish Plant).

The result of processing the application is as follows:

| The Town of Bay de Verde - Not approved at this time | Jan 2007 |
| The Town of Bay de Verde - Approved subject to the stipulations | Nov 2007 |
| The Town of Bay de Verde - Approved subject to the stipulations | Jun 2015 |

This application requires your consideration.

From Joanne Janes, Clerk IV, Mineral Lands Division

Dear,

Please prepare for resolution. Include the following cond’s

1. Approved granted for duration of contract.

2. Military training due to the size of the Hazardous Material (Armored Tank) to be utilized at the fish plant.

3. Parking & access to the plant by motor vehicles is not to be obstructed in any form.

4. Access to the quarry is to be confined to the route judge due to the fact there are wells and pipelines proceeding westwards to the fish plant on the cliff side.

Sincerely,

Joanne Janes

15/6/19
REFERRAL LETTER

File Number: 7117827
Permit Number: 131635
Referred: 25-May-2015

I have been directed by the Honourable Minister of Natural Resources to submit to you for your concurrence or otherwise, the following application:

Applicant: RJG Construction
Quarry Location: Bay de Verde (Fish Plant)
Quarry Materials: Rock
Area of site: 1
NTS map sheet: 02C/02
Electoral District: Trinity-Bay de Verde

The site is shown on the attached map. To minimize delay in the processing of this application, we request that any objections be forwarded within 2 weeks of the date of this letter.

If no reply is received by June 8, 2015 your concurrence will be assumed.

Would you kindly complete your reply below and return it to this division. Please attach additional sheets if necessary.

Gerald Kennedy
Manager, Quarry Materials

This application is:

☑ Approved

☑ Approved subject to the stipulations below

Not approved, reasons given below

Comments:

1) The permit should be for the length of this phase of the project only.
2) No materials are to leave Bay de Verde.

Signed by: [Signature]

The Town of Bay de Verde
The Town of Bay de Verde

3) There is to be minimal or no blasting due to the size of the Hazardous Material (Ammonia Tank) stored and utilized at the Fish Plant.
4) Parking and access to the plant by motor vehicles is not to be obstructed in any way.
5) The road accessing the quarry is to be located on the waterfront due to the fact that there are “wells” and pipelines providing salt water to the fish plant on the cliff side.

SUBORDINATE PERMIT APPLICATION

Subordinate quarry permits are typically issued for one month only and for specified quantities of material, from existing quarries only. A royalty of 50.69 per cubic metre of material to be removed must accompany the application.

NOTE: Royalty payments will NOT be credited or carried forward to the next calendar year.

Subordinate permit applications will NOT be processed until written consent from the quarry permit holder is received by the Department via mail, email or fax.

I/We Pennecor Heavy Civil Limited
Address: 1309 Topsail Road St John's
Postal Code: A1B 3N4

hereby apply for a Subordinate Quarry Permit for cubic metres under the terms and conditions of the Quarry Materials Act, S.NL 1998.

Permit Holder Name: Bay de Verde Harbour Authority
The No. or Permit No.: 711 7339

For the purpose of removing:
☐ Sand
☐ Gravel
☐ Rock
☐ Borrow material
☐ Horticulture peat
☐ Stockpiled material
☐ Other (please specify)

The quarry operation will involve:
☒ Drilling and blasting
☐ Ripping
☐ Crushing
☐ Screening
☐ Washing
☐ Use of settling ponds
☐ Pit run removal
☐ Asphalt batch plant
☒ Concrete batch plant
☐ Other (please specify)

NOTE: Topsail removal is NOT permitted

Proposed end use of material:
Brant water Armour stone
Bay de Verde

Location of end use material:

CONTRACT INFORMATION:
Complete this section only if the quarry material is required for a specific contract:
Agency Awarding Contract: Public Work, Canada
Address: __________________________
Contract No.: R.076510.001
Anticipated Starting Date: August
Amount of material required:
Class A: __________________________ m³
Asphalt aggregate: __________________________ m³
Have you been awarded the contract? ☐ YES ☐ NO

Class B: __________________________ m³
Other (please specify): 18,500 m³
Armour

Hi Rod,

Regarding the subordinate quarry permit (SQP) application: the written consent of the host quarry permit holder (see clause three of the SQP application form) and the royalty cheque (18,500 m³ at 75c/m³ + $13,875) have yet to arrive. Please note that the application cannot be processed without them and will remain on hold pending their receipt; please advise.

Cheers,

Ges.

ATTENTION: Robert Giovannini

Dear Sir/Madam,

STATUTORY RETURN FOR PITS AND QUARRIES - PERMIT NUMBER 131836

Enclosed is a Production Report Form to be completed and returned to this Department. It is required as a condition of your permit or lease under the Quarry Materials Act, 1998 and under the authority of Section 7 of the Mining Act. The Production Report, along with the appropriate Royalty Payment, must be submitted within 60 days of expiry of the permit.

- The report must be filed even if there was no production.

- If you are reapplying for a Quarry Permit to this location for the year 2016, your application will be considered incomplete and will not be processed unless the production return, royalty payment and the $105.00/hectare rental fee are submitted.

- If we do not receive a complete and acceptable application from you for a new permit to this site within this 60 day period, the area will be available for application to other parties.

If you have any questions, please contact Joanne Janes at (709) 729-4044.

Yours truly,

[Signature]
Manager, Quarry Materials
STATUTORY RETURN FOR PITS AND QUARRIES

Production Report - 2015

RJG Construction
Bay de Verde (Fish Plant)

Report on production for the twelve months ended December 31. This report must be returned by March 1, 2016.

Conversion Factors 1m³ = 2.0 tons 1m³ = 1.3yd³ 1yd³ = 1.75 short ton Royalty Rate: $0.75 per m³

1. Type of Operation
   - [ ] Bedrock Quarry    [ ] Till    [ ] Sand    [ ] Gravel    [ ] Peat
   - [ ] Surface Processing
     - [ ] Drilling & Blasting    [ ] Ripping    [ ] Crushing    [ ] Screening    [ ] Washing    [ ] Other
   - [ ] Total amount removed:

2. If a bedrock Quarry, type of material removed:
   - [ ] Granite    [ ] Trap    [ ] Marble    [ ] Sandstone    [ ] Limestone    [ ] Shale    [ ] Other

3. Material Sold or Used from the Permit/Lease
   Production should include material sold, or used in own fabrication/secondary processing.
   Do NOT include: Include:
   - 1. Production by others under subordianted permit 1. Material removed by yourself or a subcontractor under your direction
   - 2. Transportation costs 2. Value of material as well as cost of drilling, blasting, crushing, screening, washing and loading.

NOTE: The dollar value of material sold and/or used should be the value of the product at the pit. For material used, a reasonable value would be the amount one might pay for such material if it was purchased at a pit or operation in the area.

**QUARRY PERMIT NUMBER: 131835**

This quarry permit, issued under the provisions of The Quarry Materials Act, 1996 entitles: RJG Construction of St. John's, NL, to dig for, excavate, remove, and dispose of Rock, for an area comprising approximately 1 hectare(s) located in the district of Trinity-Bay de Verde and being more particularly indicated on a map under File Number 7117527 in the Department of Natural Resources and generally described and shown as indicated on the attached map at: Bay de Verde (Fish Plant).

Removal of topsoil is not allowed under this permit.

This permit is non-transferrable and expires on 31 DEC 2015.
subject to the following terms and conditions:

General
1. (a) This permit does not relieve the Permit-holder from adhering to any other Provincial and Federal Act or Regulation or from obtaining all other permits that may be required for the quarry operation, for example, municipal development permits, development control permits, highway access permits, cutting permits, environmental permits for asphalt plants, stream crossing, and or any others which may be necessary.

(b) The Permit-holder shall conduct his quarry operations in a safe and efficient manner in compliance with the provisions of the Regulation of Mines Act and Occupational Health and Safety Act and all Regulations made thereunder.

(c) A rental of $105.00 per hectare is payable in advance.

(d) A royalty of $0.75 per cubic metre of material removed is payable within 2 months from the expiration of this Permit.

(e) The Permit-holder shall leave tree screens where they exist between the workings and adjacent roads, highways or other land uses as per 1(e).

(f) Where no tree screens exist, earthen berms shall be constructed to screen the operation from adjacent roads, highways or other land uses as per 1(e).

(g) The Crown reserves the right to quarry and take from the area, at any time, all the quarry materials it requires for the purpose of calling in for the operation to compensate the Permit-holder in any way.

(h) A copy of this Permit shall be at the quarry site at all times that operations are proceeding.

(i) Any person authorized by the Minister may at any time enter upon the area for Departmental purposes in order to inspect, map or examine the quarry operation.

(j) This permit may be cancelled by the Minister without notice if the Permit-holder fails to comply with any of the terms and conditions of this Permit or The Quarry Materials Act and regulations made thereunder.

Restrictions
2. (a) There shall be no quarrying within 50 metres of any roadway, waterbody or watercourse, nor within 300 metres of any residential development without the permission of the Minister in writing. In Protected Road Zone Areas, there shall be no quarrying within 90 metres of the centre line of the road without the written permission of the Development Control Division, Department of Municipal and Provincial Affairs.

(b) There shall be no quarrying within 15 metres of private property unless the prior written consent of the owner of the private property is first obtained and a copy of this consent document is forwarded to the Department of Natural Resources.

(c) The Permit-holder is responsible for ensuring that no topsoil is removed from the area, unless the permit states topsoil removal is allowed, and that there is no unauthorized access to the area.
(d) The Permit-holder, in the conduct of the quarry operations shall not pollute or permit the pollution of any pond, brook, river or other waters.

(e) Except with the consent of the Minister of Environment and Conservation, the Permit-holder shall not in any way interfere with any pond, brook, river or other waters.

(f) The Permit-holder shall, in the conduct of the quarry operations, comply with all laws of the Parliament of Canada and Regulations and Orders made thereunder relating to the prohibition of pollution of waters.

(g) All access roads to each operation shall be bridged or culverted where they cross brooks or streams in accordance with the Regulations of the Department of Environment and Conservation.

(h) Except with the written permission from the Minister, quarrying is not permitted to result in the excavation of areas below the level of the water table nor in any way to cause the accumulation or ponding of water in any part of the quarry site. Settling ponds, in particular, require both the written permission of the Minister and approval of the Department of Environment and Conservation.

(i) No building or structure shall be erected upon the permit area without the prior written approval of the Minister.

(j) All buildings, structures and equipment erected shall be kept in good repair and working order.

(k) The area shall be kept free of refuse, abandoned vehicles and equipment and any derelict buildings.

Site Preparation

3. (a) The Permit-holder shall, prior to commencing operations, erect suitable corner posts or rock caims at least 1 metre high and carry out suitable blazing of trees or erection of flag or fence material to outline the area under permit.

(b) All boundary markings shall be maintained during the term of the permit.

(c) The area to be excavated shall be clear cut of all vegetation prior to the removal of any quarry material. Also, the nearest Forestry Management office must be contacted to obtain any necessary cutting permits and to receive instructions regarding the salvage of wood. Only that area necessary for one year’s production may be cleared under this permit.

Quarry Operations

4. The Permit-holder shall conduct his quarry operations in an efficient manner as set out below.

(a) All stumps, organic material and topsoil (including the rusty colored and iron stained layer) shall be stripped and stockpiled at least 5 metres from uncleared areas and 10 metres from active quarry or stockpile areas. The Permit-holder shall ensure that the quality of the topsoil is not affected by dilution with other materials.
The quarrying of the desired materials shall be conducted in a systematic manner taking into account the life expectancy of the operation, the eventual slopes and grades upon completion, the potential "after quarry" use of the site and the various grades of materials available at the site. Benching may be necessary to allow for the extraction of specific types or grades of naturally sorted aggregates or to prevent the contamination of higher grade materials by lower grade materials. High grade, high quality materials shall not be used when lower grade materials would be adequate, i.e. concrete grade gravel shall not be used as fill or road subgrade, etc.

The quarry faces during operation shall not exceed 5 metres in height except with the written permission of the Minister.

**Termination of Operation**

5. (a) Not less than thirty days prior to abandonment of a site, the Permit-holder shall notify the Department of Natural Resources to arrange for an inspection of the site.

(b) Upon surrender, cancellation or expiration of the permit, the Permit-holder shall, within thirty days after the surrender, cancellation or expiration, take from the permit area any buildings, machinery, channels, personal property and quarry material which has been extracted and in default of doing so, the Minister may sell or otherwise dispose of the said buildings, machinery, channels, personal property and quarry material upon such terms and conditions as the considers expedient. In the event that the cost of disposing of the said buildings, machinery, channels, personal property and quarry materials exceeds the amount recovered by the Minister the Permit-holder shall notwithstanding the surrender, cancellation or expiration of the permit pay to the Minister any deficiency.

(c) Upon completion of the operation or during extended periods of shutdown, the access road to the quarry shall be ditched or barred to the satisfaction of the District Manager, Department of Transportation and Works.

(d) Upon completion of quarrying, all pit and quarry slopes shall be graded to slopes less than 20° or to the slope conforming to that existing prior to quarrying; waste overburden may be used for sloping but the topsoil or organic materials shall not be used for sloping. Following sloping, the topsoil and any organic materials shall be respread over the entire quarried areas. Seeding is required so as to produce a vigorous plant growth.

(e) Rehabilitation of the quarry site as outlined in 5(d) above may with the written permission of the Minister not be implemented in the case of an operation or quarry that is deemed by Mines staff to still contain sufficient reserves of materials that may be mined in the near future. In this case, rehabilitation may be required only for those areas or parts of the pit or quarry mined out. Sloping and seeding of remaining topsoil stockpiles may be required.

(f) A complete report, on the form provided, stating the quantity and type of material removed under this permit shall be filed with the royalty payment referred to in Condition 1(d) of this Permit.
"Special Terms" additional to the above terms and conditions:

1. Town approval is for the duration of this phase of the contract only.
2. Access to and parking at the fish plant is not to be impeded in any way.
3. Access to the quarry is to be confined to the ocean side so as to avoid walls and pipelines supplying salt water to the fish plant on the cliff side.
4. Quarrying is to be confined to the southern end of the site, aka 'The Hole.'
5. No quarrying-related activity within 15 m of any sheds in the area.
6. Blasting must be kept to an absolute minimum to avoid stress on the large Hazardous Material Tank (stores ammonia for use at the fish plant).
7. The permit holder will be held responsible for any damage to personal or business property resulting from quarrying-related activity.

Topsoil removal is NOT permitted

Proposed end use of material:

Location of end use material:

SITE PREPARATION:
At the time of application, the site being applied for must be clearly marked on the ground with a company sign and flagging to mark the corners and to outline the area.

is the site visible from nearby highways or main roads? ☐ YES ☐ NO
is there existing access to the quarry site (e.g., road, trail)? ☐ YES ☐ NO
Describe the type of vegetation cover over the area to be quarried (e.g., forest, scrub, barren, etc.):

Describe marking, if any, in addition to the above required markings:

LAND USE INFORMATION:

☐ Is the site being applied for an existing quarry? ☑ YES ☐ NO
  if yes, what are the dimensions of the quarry? Width: ___ Length: 150 Average face heights: 25

☐ Are there any structures (e.g., house, fence, pole line) within the boundaries of the quarry site? ☐ YES ☐ NO
  if yes, describe the structures & give distances from the site:

☐ Are there any brooks, rivers, ponds or streams within the boundaries of the quarry site? ☐ YES ☐ NO
  if yes, specify type of water body:

☐ Are there any brooks, rivers, ponds or streams within 200 metres of the boundaries of the quarry site? ☐ YES ☐ NO
  if yes, specify type of water body and give distances from the site:

☐ Is there any land being used within a 300 metre radius of the boundaries of the quarry site? ☑ YES ☐ NO
  if yes, describe the land and give distances to the site:

LOCATIONAL INFORMATION:
Describe the location of the proposed quarry with reference to the UTM grid (NAD 1927) on a 1:50,000 topographic map. Description must include NTS map sheet, UTM zone and the co-ordinates. List co-ordinates of each corner in the spaces provided below. Additional coordinates may be listed on an additional sheet and attached to this application.

NTS MAP SHEET (e.g., O11/10):

1. ___________ mE ___________ mN
2. ___________ mE ___________ mN
3. ___________ mE ___________ mN
4. ___________ mE ___________ mN
5. ___________ mE ___________ mN
6. ___________ mE ___________ mN
7. ___________ mE ___________ mN
8. ___________ mE ___________ mN

UTM ZONE: ☐ 19 ☐ 20 ☐ 21 ☐ 22

Describe the location of the proposed quarry with reference to nearby prominent landmarks (road intersections, bridges, etc.) to nearest tenth of a kilometre: RAY DE NEEDE (Est. point) 15
**Sketch of Quarry Site**

In the space below, draw a sketch showing the following:
- the boundaries and distance between corners of the site being applied for,
- outline of existing quarry (if one exists),
- distances of all features within the quarry site,
- all features within a 300 metre radius of the boundaries of the quarry site, including all features listed in the "Land Use Information" section of this application.
- the proposed access to the site and the distance the quarry site is set back from the highways or main roads.
- the location of where the UTM coordinates were taken

See the attached Google Earth image.

Sketch map may be a detailed survey of the area of the permit; location of the permit on a detailed cadastral or forest inventory map; a detailed aerial photograph or a Google Earth image.

I certify that the information contained in this application is correct.

Attention: Robert Giovannini

Dear Sir/Madam,

QUARRY PERMIT APPLICATION REFERRAL NOTICE

This will acknowledge receipt of your application for a quarry permit with respect to the land situated at Bay de Verde (Fish Plant).

Your application is being processed and has been referred to the following authorities:

The Town of Bay de Verde
Dept of Natural Resources, Andrea Devereaux

In order to assist the above authorities in evaluating your application, it is necessary that you mark the corners and boundaries of the site being applied for. It is suggested you use flagging and post a sign(s) stating, “Site of Quarry Permit application.”

The markings are to be removed if the application is not approved. You should hear further in the matter in about 30 days.

Yours truly,

Gerald Kennedy
Manager, Quarry Materials
Newfoundland Labrador

PRODUCTION REPORT - 1999

Report on production for the twelve months ended December 31. This report must be returned by March 3rd, 2000.

1. Type of Operation
   - [ ] Bedrock Query
   - [ ] Bedrock and Till
   - [ ] Till
   - [ ] Sand & Gravel
   - [ ] Peat
   - [ ] Other

2. On Site Processing
   - [ ] Drilling & Blasting
   - [ ] Ripping
   - [ ] Crushing
   - [ ] Washing
   - [ ] Screening
   - [ ] Other

3. Material Sold or Used from the Permit/Lease
   Production should include material sold or used in own fabrication/secondary processing.
   Do not include:
   - 1. Production by others under subordinate permit
   - 2. Transportation costs
   Include:
   - 1. Material removed by yourself or a subcontractor under your direction.
   - 2. Value of material as well as cost of drilling, blasting, crushing, screening, washing and loading.

NOTE: The dollar value of material sold and/or used should be the value of the product at the pit. For material used, a reasonable value would be the amount one might pay for such material if it was purchased at a pit or operation in the area.

Attention: Jim Weir

Dear Sir/Madam,

DRAFT PERMIT LETTER: PROVISIONAL NUMBER 106755

Enclosed herewith you will please find a draft quarry permit, in duplicate, with respect to about 3. hectare(s) of land situated at In Bay de Verde near Shoreline and Fish Plant.

Would you please sign both copies in the space provided, have your signature(s) witnessed and return both documents to this office for execution by Government.

When returning the signed copies you should remit your cheque in the amount of $240.00 to cover the rental at $80.00 per hectare for the 3. hectare(s) involved in the permit.

You are advised to thoroughly read all conditions of this permit before signing. Any violation of any of the terms can lead to cancellation.

If the permits are not returned within six weeks of the date of this letter the application will be deemed to have been cancelled by you.

One copy will be returned to you for your files when the permit has been fully executed.

Yours truly,

Fred Kirby, P.Geo.

Dear Sir/Madam,

Production Report for Quarry Permits and Leases: Permit Number 106755
Issued: 990805 Location: In Bay de Verde near Shoreline and Fish Plant

On the reverse side of this letter is a Production Report form to be completed and returned to this Department. Please return the original form when completed and retain a copy for your records. The Production Report is required as a condition of your permit or lease under the Quarry Materials Act, 1996 and under the authority of Section 9 of the Mines Act. The Production Report, along with the appropriate royalty payment, must be submitted within 60 days of expiry of the permit. Royalty payment for all material removed is 30 cents per cubic meter.

- The report must be filed even if there was no production.
- If you are reapplying for a Quarry Permit to this location for the year 2000, your application will be considered incomplete and will not be processed unless the production return and royalty payment are submitted.
- If we do not receive a complete and acceptable application from you for a new permit to this site within this 60 day period, the area will be available for application to other parties.

If you have any questions, please contact Joanne Janes at (709)729-4044.

APPLICATION FOR A REGULAR QUARRY PERMIT

1/We Wears Construction Limited Phone No. Bus: 3684081
Address Box 879 Menews Postal Code A1W 1V1
Res:
HEREBY APPLY FOR A REGULAR QUARRY PERMIT for hectares for
months under the terms and conditions of The Quarry Materials Act, 1978. (See definition of permit types on reverse side.)

FOR THE PURPOSE OF REMOVING: THE QUARRY OPERATION WILL INVOLVE:

☐ Sand  ☐ Drilling and Blasting
☐ Gravel  ☐ Ripping
☐ Rock  ☐ Crushing
☐ Borrow Material  ☐ Screening
☐ Topsoil  ☐ Washing
☐ Fuel Peat  ☐ Use of Settling Pond
☐ Horticulture Peat  ☐ Pit run removal
☐ Other (Specify)  ☐ Other (Specify)

Complete this section only if the material is needed for a specific contract.

Agency awarding contract Department of Public Works
Address Phone No.
Contract No. 2117284 Tender closing date
Anticipated starting date March 10/2000 Anticipated completion date April 30/2000
Amount of material req’d: Class “A” Class “B”
Asphalt aggregate Other (specify) Armour Stone 1000 t.

Proposed end use of material Additional Armour Stone For Breakwater
Location of end use material Bay De Verde Breakwater

Ownership of land to the best of your knowledge ☒ Crown ☐ Private

If Private, complete the following and attach a letter from the owner authorizing you to occupy the property for the purpose of removing quarry material.

Name of Owner
Address Phone No.

Form of Title

Crown Grant Date Issued Volume Folio
Crown Lease Date Issued Number
Other (Specify)
Describe the location of the proposed Quarry with reference to the UTM grid (NAD 1927) on the 1:50,000 Topographic Map. Description must include NTS Map Sheet, zone and the coordinates of:

Corner #1: N E
Corner #2: N E
Corner #3: N E
Corner #4: N E

Describe the location of the proposed Quarry with reference to nearby prominent landmarks, road intersections, bridges, etc. to nearest tenth of a kilometre. At Bay De Verde on Shoreline adjacent to Breakwater & Fish Plant.

The information in this section can be completed by using a Global Positioning System. Inaccurate information will cause delays.

At the time of application, the site being applied for must be clearly marked on the ground using 2 X 4 posts, with a company sign and flagging to mark the corners, and to outline the area.

Is the site visible from nearby highways or main roads? __No__
Is there an existing access to the quarry site? __Yes__

Describe the type of vegetation cover over the area to be quarried (forest, scrub, barren, etc.)

Barren

Describe markings if any in addition to the above required markings

Is the site being applied for an existing quarry? __Yes__. If yes, what are the dimensions of the quarry? Width 200 Length 150 Average Height of quarry faces 20 M

Are there any structures (house, fence, pole line, etc.) within the boundaries of the quarry site? __No__

If yes, describe the structures and give their distance from the site

Are there any brooks, rivers, ponds or streams within the boundaries of the quarry site? __No__

If yes, specify type of water body

Are there any brooks, rivers, ponds or streams within a 250 metre radius of the boundaries of the quarry site? __No__. If yes, specify type of water body and give its distance from the site

Is any of the land within a 250 metre radius of the boundaries of the quarry site being used? __Yes__

If yes, describe the land use and give the distance from the site __Fish Plant__

__Breakwater__
SKETCH OF QUARRY SITE

In the space below, draw a sketch showing the boundaries and distance between corners of the quarry site being applied for, outline of existing quarry if one exists, distances of all features within the quarry site and all features within a 250 metre radius of the boundaries of the quarry site. That is, the location of the features listed in Section 7 of this application. Also, show the proposed access to the site, the distance the quarry site is setback from the highways or main roads.

Have you had permits for this site before? Yes If yes, list permit numbers

I certify that the information contained herein is correct.

Date Feb 25/2000 Name Darrell Vardy

Dear Mr. Weir:

An inspection was conducted of your quarry site located at Bay de Verde on August 7, 2000. At this time it was noted that there is a considerable volume of loose debris on the face which is near vertical. Given the proximity to a fish packing plant operation, and given that people are parking at the base of the site, it is recommended for the purpose of human health and safety that signs be placed at the site warning of the potential of rockfalls.

Should you have any further questions, please do not hesitate to contact me at (709)729-6410 or fax at (709)729-6782.

Sincerely,

Michelle White

Dear Sir/Madam,

STATUTORY RETURN FOR PITS AND QUARRIES: PERMIT NUMBER 107431

Enclosed is a Production Report Form to be completed and returned to this Department. It is required as a condition of your permit or lease under the Quarry Materials Act, 1998 and under the authority of Section 9 of the Mines Act. The Production Report, along with the appropriate Royalty Payment, must be submitted within 60 days of expiry of the permit.

- The report must be filed even if there was no production.
- If you are reapplying for a Quarry Permit to this location for the year 2001, your application will be considered incomplete and will not be processed unless the production return and royalty payment are submitted.
- If we do not receive a complete and acceptable application from you for a new permit to this site within this 60 day period, the area will be available for application to other parties.

If you have any questions, please contact Joanna Jones at (709) 729-4044.

If a Bedrock Quarry, go to # 5.

5. Material Sold or Used from the Permit/Lease (complete this section for a Bedrock Quarry):

Production should include material sold or used in operations related to primary production.

Do NOT include:
1. Production by others under subordinate permit.
2. Transportation costs.

Material removed by oneself or a subcontractor under your direction.

NOTE: The dollar value of material sold and/or used should be the value of the product at the pit. For material used, a reasonable value would be the amount one might pay for such material if it was purchased at a pit or operation in the area.

Attention: Mr. Darryl Vardy

Dear Mr. Vardy:

As per earlier letters, your former quarry permit File Number 711:5538, Permit Number 107431 located at Bay de Verde, expired in 2000. This site has not been rehabilitated. Rehabilitation is required as per Section 5 of the Terms and Conditions of your former permit. Rehabilitation of this site must be completed prior to August 31, 2002. This site would be easily rehabilitated this summer as your equipment is already engaged in a construction project in near by Ochre Pit Cove.

Of particular concern is the face height which is in excess of 5m as per Section 4 (c) of the Terms and Conditions of your former permit where it states that “The quarry faces during operation shall not exceed 5 meters in height except with the written permission of the Minister”. There is also overhang and loose material on the face which should be scaled. This site must be rehabilitated and secured.

Should you have any questions regarding the content of this letter or require further clarification, please do not hesitate to contact me at (709) 729-6410 or fax (709) 729-6782. In the event that I cannot be contacted, please contact Fred Kirby at (709)729-6447. Thank you for your assistance in this matter.

Regards,

Michelle White
Quarry Inspector

c Fred Kirby, Manager of Quarry Materials
Ken Andrews, Director of Mineral Lands
Bill Finn, Occupational Health and Safety, Department of Labour
Dear Mr. Kirby,

I am hoping that your department is able to provide me with the information on the quarry permit you issued to Weir Construction in 1999 for the extension of the Bay De Verde Breakwater.

As you know from our conversations that I'll need to have this information.

It would be appreciated that you contact me as soon as possible, whatever the answer.

Thank you for your cooperation in this matter.
1:00 p.m.

(Spot was made, then concreted in.)

Damage was done, wrong and nightime.

Spots done.

- 12 p.m. from homes (not numbered)
- Place preceding.
- Fencing needed to screen noise from railroad
  - Break 31-35

-Spot is
- segment from where the children play but they
  - put notice to home and hear
- Put parties I have its report
October 10, 2002

S.40(1)

Dear [Name],

This letter is in response to your letter received by this office on September 30, 2002 requesting information on the Weirs Construction permit in Bay de Verde issued in 1999.

A quarry permit 106755 was issued to Weirs Construction Ltd. on August 5, 1999 for a 3 hectare site located in Bay de Verde near the fish plant. The material was required for use in the extension to the breakwater in the area. The permit was reapplied for and a new permit was issued in 2000 (107431) which expired on December 31, 2000. The permit was not reapplied for after that date.

I trust the above is what you required. I am available at your convenience to discuss the above.

Yours truly,

Fred Kirby, P. Geo.
Manager, Quarry Materials

c: K. Andrews

Dear Mr. Williams...As another election approaches once again I am considering sitting back and choosing not to vote...I was disappointed that I never had the opportunity to meet you in person when you visited our community as I was working at the time.....To cut to the chase I would like your opinion on this situation...In 1999 the government granted an extension for our breakwater...as a result of that our property has had ongoing damage resulting from rocks flying in high winds (the quarry permit was very close to our home)...no one still wants to claim responsibility...I have tried on many occasions to see who exactly is responsible for the restoration of the area that was excavated and to see if the company was supposed to be in that area at all excavating....(I've tried to find out exactly how many feet they are allowed to go by someone's property...but haven't succeeded)...I have been told lately by [redacted] rep in Bay Roberts to get a lawyer...which financially at present is not an option! The time factor here seems to be an issue with everyone I've been in contact with...In 1999 at the time of the most extensive damage [redacted] if this was not an ongoing problem with the rocks I would not be wasting my time writing or calling anyone...thank you for your time...

Add photos to your e-mail with MSN 8. Get 2 months FREE*.
Further to the site visit to investigate a complaint by Mr. R. G. Dillon concerning a quarry pit fall in unsatisfactory condition. I write the following.

Aerial photography of the area taken in 1992 indicated a fair amount of overburden had been removed. Since then, however, subsequent aerial photography has not been possible due to the unsatisfactory condition of the equipment in use. I have attempted to determine the extent of overburden by taking a photograph from the pit and checking it with the enhancement control at the most to 5 meters overall.

And I did note any areas near the residences where the soil cover has been removed. Pictures, however, there is one area near the water storage tank where the soil cover has been removed. Foundation would alleviate this problem. The area overall 2000 square meters is $3000.

Mr. R. G. Dillon
Regional Engineer

RE: Bay de Verde
 Quarry pit complaint

Further to a site visit to investigate a complaint by [name redacted] of Bay De Verde concerning a quarry pit left in an unsatisfactory condition, I offer the following:

Aerial photography of the area taken in 1983 indicates a fair amount of excavation had been done at the site up to that date. Given there is not more recent photography available it is difficult to judge the amount of excavation that has been done at the site since 1983, however, distances were scaled from the aerial photo to determine the location of the embankment in 1983 as compared to today. It appears excavation since 1983 has been very minimal with the embankment receding at the most ± 1 to 3 metres overall.

And, I did not note any areas near the residences where the sod cover has been removed—see pictures. However, there is one area near the water storage tank where the ground had been scarified, but this is further uphill.

Hydroseeding would alleviate this problem. Estimated cost to hydroseed an area approximately 2000 square metres is $3000.

Background

The Town and Mines & Energy both say the property is crown land.

The owner was the Bay De Verde Harbour Authority via Small Crafts and Harbours, a division of Department of Fisheries & Oceans.

Mines & Energy is the governing authority w.r.t. quarry pits. I spoke with the Quarry Inspector for the area; Gerald Kennedy, he stated he has investigated the claim by [name redacted] already and that "nothing more can be done with the quarry pit."

Hon. Ed Byrne
Minister of Natural Resources
P.O. Box 8700
St. John’s NL A1B 4J6

Dear Mr. Byrne:

Please see attached a follow up to a site visit at the residence of [redacted] of Bay de Verde. [redacted] had contacted me in late December complaining about a quarry pit near their house. [redacted] claims that during high winds rocks damage [redacted] property and [redacted] have seen the damage it caused. I contacted the Department of Municipal and Provincial Affairs and they sent someone out to investigate. The Department now tells me that it is an issue for the Department of Natural Resources.

Could you please have someone look into this for [redacted]

Thank you for your time.

Sincerely,

Charlene Johnson, MHA
Trinity-Bay de Verde
Briefing Note
(Natural Resources)

Title: 

Issue: maintains that loose material left exposed from previous quarry operations is being blown by the wind into a house causing damage.

Background:
- Weirs Construction Ltd. applied for a quarry permit next to the fish plant in Bay de Verde on July 13, 1999.
- The permit was required for breakwater reconstruction at the site.
- The permit was for existing loose rock which was left during the original construction of the breakwater and fish plant.
- The application was referred to the following agencies:
  Crown Lands - St. John's - Conditional Approval
  Dept. Natural Resources - Conditional Approval
  Dept. Municipal & Provincial Affairs - Conditional Approval
  Federal Fisheries - St. John's - Conditional Approval
  Government Service Centre - Conditional Approval
  Dept. Transportation & Works - Approval
  Town of Bay de Verde - Conditional Approval
- The permit was approved and issued on August 5, 1999 with the following special condition: “There is to be no blasting at this site. Pit run removal only.”
- This permit expired December 31, 1999 with production reported of 12,385 m³.
- Permit was reapplied for on March 1, 2000, and after approval from the Town of Bay de Verde was reissued for 2000. Permit expired December 31, 2000. No production was reported for 2000. Permit was not reapplied for.
- An inspection of the site was conducted on August 7, 2000. The company was contacted about loose rock in the face and the need to post falling rock signs.
- Received a call from Mr. Ray Tulk, Executive Assistant to the MHA for the area on January 1, 2001 concerning the above.
- Caller discussed the problem with . Since no material had been reported removed from the site since 1999 and we had no previous complaints, I advised to contact Weirs directly.
- Received a letter from on September 30, 2002 requesting information on quarry permits issued to Weirs Construction in the area.
- The information was forwarded by letter to October 10, 2002.
- A quarry permit was issued to Northland Contracting Inc. in 2002. The company reported no production.
- Our quarry inspector visited the site on October 9, 2002 and observed the damage reported by and proceeded to the face of the cliff and did find small rock particles hitting his face.
Status:

- At present there is no quarry activity at the site. Any quarry activity approved for this site would be in conjunction with breakwater or fish plant development in the area.

Recommendation:

- Since the initial report of damage was received after the work had been completed, we have no way of knowing if the damage done was as a result of the quarry activity. As with any quarry operation, if any damage occurs to private property as a result of operation, the responsibility is the contractors. [Redacted] should contact Weirs Construction Ltd. with a complaint and supporting evidence to get the damage repaired and take steps to get the problem which is causing the damage corrected.

**COMMENTS:***

Austin - This is a very unusual situation. From Roy's proposal the budgeting note and the recommendation is probably the best for this matter.
MEMO TO: Charles Bown
FROM: John Davis
SUBJECT: Current Status of Bay de Verde Quarry Site
DATE: April 04, 2006

Since early 2004, staff of the Mineral Lands and the Mineral Development Divisions have made 5 site visits to the Bay de Verde Quarry Site to examine physical site conditions:
- June 23, 2004
- August 16, 2004
- November 2, 2004
- May, 2005
- June 3, 2005

During the most recent site visit (June 3, 2005), Fred Kirby of Mineral Lands, and John Davis of Mineral Development accompanied Darrell Vardy of Weir’s Construction to the site to review the site conditions, and discussed remedial measures that Weir Construction could make to improve safety conditions against falling rock from the excavated rock face. The accompanying photographs illustrate the proposed alignment of a toe berm that Weir Construction may erect in the near future (1 m high by 1 m wide by 60 m long.). We are awaiting a written proposal of what Weir Construction is prepared to erect as their contribution to public safety. It is felt that any facework would aggravate the loose rock conditions especially going into the winter (June 3, 2005).

During the recent visit we contacted a representative of the Quinlan plant management and a long term employee who indicated the location of the buried water line to the plant, and to avoid digging or increasing ground pressure on the water line. The purpose in contacting the plant officials was to make them aware of the potential construction work and to determine who to contact before construction.

P.O. Box 8700, St. John’s, Newfoundland, Canada. A1B 4J6. Telephone (709) 729-5449, Facsimile (709) 729-3483
The following is a brief summary of events since 2004:

- April 26, 2005, meeting with Darrell Vardy of Weir Construction, F. Kirby, and J. Davis, to discuss remedial action and arrange a site visit.
- May 31, 2005, called Darrell Vardy to arrange a site visit with F. Kirby for June 3, 2005.
- June 3, 2005, F. Kirby, J. Davis and D. Vardy visited site and laid out potential toe berm location.
- June 10, 2005, memo on site visit and future direction of action to Charles Bown.
- April 4, 2006, due to request for status update, F. Kirby contacted D. Vardy for work status. Weir Construction expects to erect the toe berm within the next month. F. Kirby requested advance notice of commencement of work.

Sincerely;

John Davis

Subject: Fwd: Re: [redacted] Bay de Verde NL A0A 1E0

Hello Charlene... As you can see another month has almost passed since your email. Every year it has been the same thing...no answers as usual....would you please contact the "involved" department(s) in this situation and send me a letter stating that they are not responsible for the damages that have been ongoing since the fall of '93. Even this year there has been considerable rock chips on the drivers side of our truck because "I" failed to check the weather forecast and was @ work when the wind came up that day, as we have to move the truck from the driveway when the wind is up in that direction to avoid "damage"...we have given up trying to keep the sliding on the west side of the house HOLE FREE....thank you again for your time & effort in this matter.

Hi Gerry:

I previously sent a letter regarding [redacted] issue and I was wondering if you could check on the status of this for me. As you can see from below, [redacted] just wants an answer so [redacted] can take further action if necessary. I have visited the property and I can see why [redacted] is complaining. Please check into this for me as soon as you can because this has been ongoing for about three months now. I was dealing with Municipal and Provincial affairs, but it then got turned to your department. I appreciate your assistance...Charlene

---

Hello Charlene

I was wondering if you have heard anything back yet from Mines and Energy.
I have been in contact with them from the start and they never accepted responsibility so it's ironic it's in their hands again.

I have a letter from the Town of Bay de Verde saying that they are not responsible for the damages, which they received from their lawyer. Could I please receive something from the government stating the same...if this is the case. I am leaning towards getting my lawyer to look into this matter.
Like I mentioned before financially I am not in this position but maybe she could inform me of my rights and if I have grounds to sue for damages. All I ever wanted from the beginning is to get the problem “fixed”!

You can see how long it takes to get back any information. Since I first contacted you it’s been almost 3 months.

Again Charlene thank you for your help so far in this matter.

Dear Charlana,

I was wondering when you get time to the new year to try & resolve the problem I have here in Bay de Verde. I don't know if you remember our talk the day you were here campaigning with [Redacted]. I am [Redacted].

I am hoping that maybe you could help me get to the right person responsible to get the cliff behind our house hydroseeded so that we can resolve the problem of being constantly hit by rocks flying in high winds. We would like to get the siding fixed on our house but do not see the point when it is only going to be damaged again. It is unfortunate that this could not be resolved before this but everywhere I've turned I have been told they weren't responsible, and was told to go to a lawyer on many times. The problem originally started in 1999 after the extension of the breakwater was completed by Wair Construction, the problem originating from excavating so close to our property where they removed all the sods & left the everything open to the wind.

I thought I'd try one more time with you to see if the government would take it under consideration this spring to hydroseed the area back to it's original condition before the excavation.

The problem is ongoing & it is disheartening to have to get out of your bed to move your vehicle in the middle of the night if I happen to miss the forecast where we won't experience any more rock damage to our truck.

Maybe the next time we have a storm & being bombarded by rocks I'll get a video & have it on tape for some proof. I am sure I can get alot of signatures from here to validate this since 1999.

Anything you can help with would be appreciated. I am not looking forward to this winter with all the high winds, storms & rocks! The only thing I can see resolving this problem is hydroseeding. But I'd be more than happy to leave it up to an expert!

Thank you for your time in this matter.

Department of Natural Resources

Memo To: Ken Andrews, Director Mineral Lands

From: Len Mandville, Mineral Development Geologist
       John Davis, Mineral Development Engineer

Subject: Bay de Verde Quarry

Date: June 25th, 2004

On June 23rd, we inspected the site in response to the concerns of local residents that rocks were blowing out of the quarry area and causing damage to nearby properties. We were accompanied on the site visit by Gerald Kennedy.

Quarry Description
The Bay de Verde quarry is adjacent to the shoreline, and abuts the fish plant property. There are a number of residences within 200m to the northeast of the quarry. (see photos 1&2)

The quarry contains some rubble and scree material with a vertical to near-vertical face that varies from approximately 15m in the northwest to 70m in the southeast. (see photos 3&4)

The general topography of this area is rolling hills, sparsely vegetated with grasses and low shrubs and steep cliffs along the coast.

The rock in the quarry area is a highly fractured and friable rhyolite breccia.

Issue
In 1999 Weir's Construction Limited (Weir's) was issued a permit to remove rock from the area. The sketch included with their application refers to "existing loose rock adjacent to the cliff". In discussing this with Fred Kirby, he stated that he understood that Weir’s would remove material from the base of the cliff.

We spoke with [redacted] yesterday and [redacted] said that Weir's had their excavator working at the northwest edge of the quarry, near the top of the hill and the bucket and boom were visible from her property. The attached photograph from [redacted] confirms this. (see photo 5).

It appears that Weir's did not remove loose rock from the bottom of the quarry - as their plan stated - but ripped rock from the upper lip of the quarry. In doing so, the thin layer of vegetation and soil was removed and the underlying loose material was exposed to the wind. (photos 6 to 8 show the area disturbed by Weir's in 1999)

Len Mandville, Mineral Development Geologist, Box 8700, St John's, NF A1B 418, (709) 729-4439, fax (709) 729-3403, lemmandville@mail.gov nf ca
According to [redacted], the tail end of a hurricane hit the area in September of 1999 and rocks from the quarry area were picked up by the wind and these projectiles caused damage to the nearby cars and houses. (see photos 9 to 12)

[redacted] stated that this has happened on numerous occasions since then. We spoke with two other residents, [redacted] and [redacted], and they confirmed what we had been told by [redacted] said that rocks had been carried by the wind at least 25 times since 1999. It occurred more often in 1999 and 2000 and the frequency and severity has decreased since then. All of the evidence of damage and repair that we observed was on the windward side of the residences.

The three residents we spoke with said this did not happen before the quarry activity carried out by Weir's.

The people living in this area of Bay de Verde move their vehicles to another section of the town when the forecast calls for high west to southwest winds. [redacted] stated that a wind of 80 kph would effectively mean in his estimation a wind of 120-130 kph blowing through that quarry. [redacted] stated that you could not walk up the path that leads from his house toward the ocean in the worst of the wind storms because of the flying rock.

[redacted]'s house is approximately [redacted] metres northeast of the quarry; the [redacted] households are a further [redacted] metres in the same direction. (see photo 13)

It is important to state that the cliff face in the area is very unstable. The rock is highly fractured and faulted and even though the area has been quarried, there is a lot of evidence of loose material that has fallen from the cliff face. (see photos 4 & 14)

There are loose rocks that may fall and these rocks pose a hazard to people working in the area of the fish plant. (see photos 15-18)

It is also important to note that some of the loose rocks in the cliff face may not be related to the quarry activity that has taken place in this area.

[The fish plant workers park their vehicles along the side of the road at the base of the cliff. We spoke with [redacted] and [redacted] said that when Northland Contracting blasted in the far end of the quarry circa 2002, rocks fell from the northwest cliff face. [redacted] said 6 or 8 "kettle-sized" rocks fell to the pavement below.]
Possible solutions

1. Soil can be spread over the upper northwest section of the quarry and the area hydro-seeded. This should be done as soon as possible to permit a growth layer to establish in the short growing season. Small clumps of grass are growing on the upper ‘bench’ in this area of the quarry. (see photo 8) The area to be covered is approximately 150 m².
2. Snow fencing could be installed along the edge of the cliff. This would prevent or limit the amount of material blowing from the quarry area.
3. Remove the rocks and fines from the upper section of the quarry using a high-pressure water hose.

Recommendations

We recommend that the area be hydro-seeded. Snow fencing would not completely eliminate the problem and maintenance of the fence would probably become a yearly activity. Given the unstable nature of the face it would not be advisable to clear the loose material from the benches and slopes using a high-pressure water hose. Removing the smaller-sized material would likely increase the instability of the face and cause more of the larger boulders to fall.

‘Danger – Falling Rock’ signs should be posted along the base of the cliff to warn people working and parking their vehicles in the area.

The issue of potential rock fall near the fish plant may warrant investigation by OH&S. We will contact Harsim Kalsi, their mining engineer with an expertise in rock mechanics and inform him about the situation.

Re: Complaint from [Redacted]

I understand from Charles that his engineers have visited this site and this report has been sent to you with recommendations for correcting the situation.

Given the nature of the problem and the time that it takes to resurface plant pipes, prepare an updated site plan and future contract actions, ASAP; Friday of this week at the latest.

Thanks

Re: Quarry Permits 106755 and 107431, File # 711:5538
Bay de Verde issued 1999 and 2000

Dear Mr. Vardy,

This Department has received a number of complaints from residents living near the fish plant at Bay de Verde that sand and small stones are being blown from the above identified permit area and causing damage to their houses and other property. This problem did not exist prior to the quarry activity conducted in 1999. Recent studies conducted by staff from this Department have shown that the probable cause of the problem was excavation activity which occurred along the top of the excavation. This activity resulted in the removal of the vegetation along the edge of the cliff which exposed finer particles of rock and gravel, allowing this material to be lifted and blown towards the properties during high wind events.

Problems with the condition of this site were brought to your attention by way of letter on August 9, 2000 and June 20, 2002, but no action was taken by your company to address these concerns. It should be noted that the permit was issued for existing loose rock adjacent to the bottom of the cliff, not to conduct excavation along the top to remove fractured rock from the entire face of the cliff.

The recent study conducted by this Department has concluded that the problem may be alleviated by hydroseeding the areas of the excavation, which is most likely causing the problem. The condition of the cliff face created by the excavation is unacceptable and poses a threat to public safety. The face has large loose boulders perched near the edge and has much loose and badly fractured material along much of the very steep face. Scaling and rock bolting will be required to address these safety issues.
The above are outstanding rehabilitation issues for the site to which you hold a quarry permit and your company is responsible to address these letters. We are available at your convenience to discuss the above.

Yours truly,

Fred Kirby, P. Geo.

Hi Gerry:

Can you have some look at this email and send me a response...thanks...Charlene

>>> George Flaherty 08/19/04 12:51PM >>>
Dear Ms. Johnson;
Further to my e-mail dated July 27/04 I incorrectly identified the quarry in question as being in Port De Grave, the Quarry is actually located in the area of Qunlan's fish plant in Bay De Verde. The rock face of this quarry is in an extremely unstable condition and its agreed by all parties that if the situation is not addressed the consequences can be quite serious, with a real potential for a fatality.

The OH&S Division is unable to take any action in this matter, since the quarry is on Crown Land, and therefore is not a workplace. The dispute over who is responsible for the present situation is not helpful in having this hazard properly addressed. We had placed caution tape in the area to warn of the danger however this tape has been removed and parking has once again resumed under the rock face.

If you wish to discuss this matter I may be reached at 729 6218 or by cell at [redacted]. If you require any additional information, or would like to visit the site in question, I would gladly accompany you.

Thank you for your attention to this matter,

George Flaherty
Manager Inspections, OH&S
MEMO TO: Charles Bown
FROM: John Davis
SUBJECT: Progress at Bay de Verde Quarry Site
DATE: June 06, 2006

Since the last update (DNR April 04, 2006), personnel from Mineral Lands and the Mineral Development Divisions have been in regular contact with Weir's Construction to arrange a day when an excavator would be available to do some remedial work at the Bay de Verde Quarry Site.

Events came together on Saturday June 03, 2006 when the writer met Weir's equipment operator at the quarry site around 9:40 am, and discussed digging conditions (avoid water line to Quinlan's plant and no scaling), and relocated the rock protection berm behind the power poles. Estimated time frame to complete berm 1 to 1.5 hours.

During last year's site visit (June 3, 2005), Fred Kirby of Mineral Lands, and John Davis of Mineral Development accompanied Darrell Vardy of Weir's Construction to the site to review the site conditions, and discussed remedial measures that Weir Construction could make to improve safety conditions against falling rock from the excavated rock face. The accompanying photographs illustrate the proposed alignment of a toe berm that Weir Construction will construct in the near future (1 m high by 1 m wide by 30 to 50 m long).

While the operator moved his excavator into position, the writer arranged with Quinlan's to have several vehicles moved from their parking spots. As illustrated in the accompanying photographs, the berm has been constructed (1.5 m by 1 m by 35 m long) and the operator was preparing to return to St. John's by 11:35 am.
The following is a brief summary of events since 2004:

- April 26, 2005, meeting with Darrell Vardy of Weir Construction, F. Kirby, and J. Davis, to discuss remedial action and arrange a site visit.
- June 3, 2005, F. Kirby, J. Davis and D. Vardy visited site and laid out potential toe berm location.
- June 10, 2005, memo on site visit and future direction of action to Charles Bown.
- April 4, 2006, due to request for status update, F. Kirby contacted D. Vardy for work status. Although Weir Construction no longer have liability for property damage, they expect to erect the toe berm within the next month.
- June 3, 2006, Weir Construction Excavator (John Deere 200 C) completed the toe berm in less than 1.5 hours.
- We feel that any face or crest work would aggravate the current loose rock conditions.

Sincerely,

John Davis

Re: Bay de Verde Quarry remediation

Dear Mr. Vardy:

This letter is to acknowledge the rehabilitation work which was carried out by Weir’s Construction Ltd. at Bay de Verde on June 3, 2006. The establishment of this rock protective Berm has made the area much safer.

Yours truly,

Fred Kirby, P. Geo.
