<td>I believe all deteriorating roads must be fixed because it is unsafe to drive your vehicle on a road full of numerous potholes, ruts and an unsafe edge of the road. The Old Cabot Highway road in Chapel Arm very much needs to be fixed. Our council fixed their portion of the road. Now it’s the provincial government’s job to do theirs. This route has also been used as a detour (3 times in the last two years) allowing hundreds of vehicles, including dozens of transport trucks to speed through our community damaging our already fragile infrastructure. I’ve witnessed a convoy of loaded car carriers meeting transport trucks on this extremely narrow section of road, scraping the entire length of the guardrail as they attempt to squeeze past each other in a space that’s not much wider than their combined width. Restrictions need to be in place and enforced to ensure the safety of residents and protect the roadways and bridges in our communities that weren’t designed to handle the weight of these vehicles.

This area has been neglected for several years. We are well overdue for new pavement and the basic maintenance required to protect our infrastructure. However, recent brush cutting in the area (contracted by DTW), which was designed to improve visibility will undoubtedly make our road conditions much worse. All of the debris was left blocking the drains and ditches which will undoubtedly lead to more drainage issues and subsequently increased deterioration of an already unsafe roadway.

<td>Bridge near Paua-Mere Road is narrow and deteriorated. A number of culverts require replacement. Catch basins require cleaning.</td>
<td>1</td>
<td>As explained above, it not only affects my ability to safely navigate the roads; it also poses a safety issue while at home due to being in such close proximity to the road as well as a sloping guardrail that’s only a few yards away from my house. Closing a certain highway depot in the summer months may be an effective way to cut costs but it’s causing a negative impact on communities in desperate need of summer maintenance and roadwork. A solution to this issue without creating additional financial strain would be to alternate the depots that are left operational in the summer months, allowing all communities to be serviced at least every second year.</td>
